Preface

Technical – Elegant – Efficient

Three keywords – one brand.
VULKAN!

High-value and elegant technical products “made in Germany” – since more than 115 years.

Our roots reach back to the year 1898. For this reason Vulkan is one of the oldest brands in the lighting industry and enjoys an excellent reputation and a high esteem – especially in the German-speaking area.

We offer highly developed and elegant technical products for cities, communities and utility companies. Products which provide standard-conform illumination for streets, traffic junctions, danger areas, pedestrian areas and public parks.

Above all, our luminaires stand for high energy-efficiency and low maintenance.

We like to present our current product portfolio on the following pages to give you a better understanding about what’s meant with “Technical – Elegant – Efficient”.

Technical luminaires

V3630 LED

V3630 LED

Innovation out of tradition!

Back in the sixties Vulkan already emerges as a trendsetter for functional luminaries. This tradition we are keeping up with our newest products.

More than ever, we are connecting the Vulkan typical and traditional functionality with the latest technology, technical innovations and an ambitious design. The result you can experience in our new V3630.

Technical – Elegant – Efficient – Typically Vulkan.

V3630 LED

High efficient LED-modules with lumen output up to 135 lm/W and a wide choice of different optics

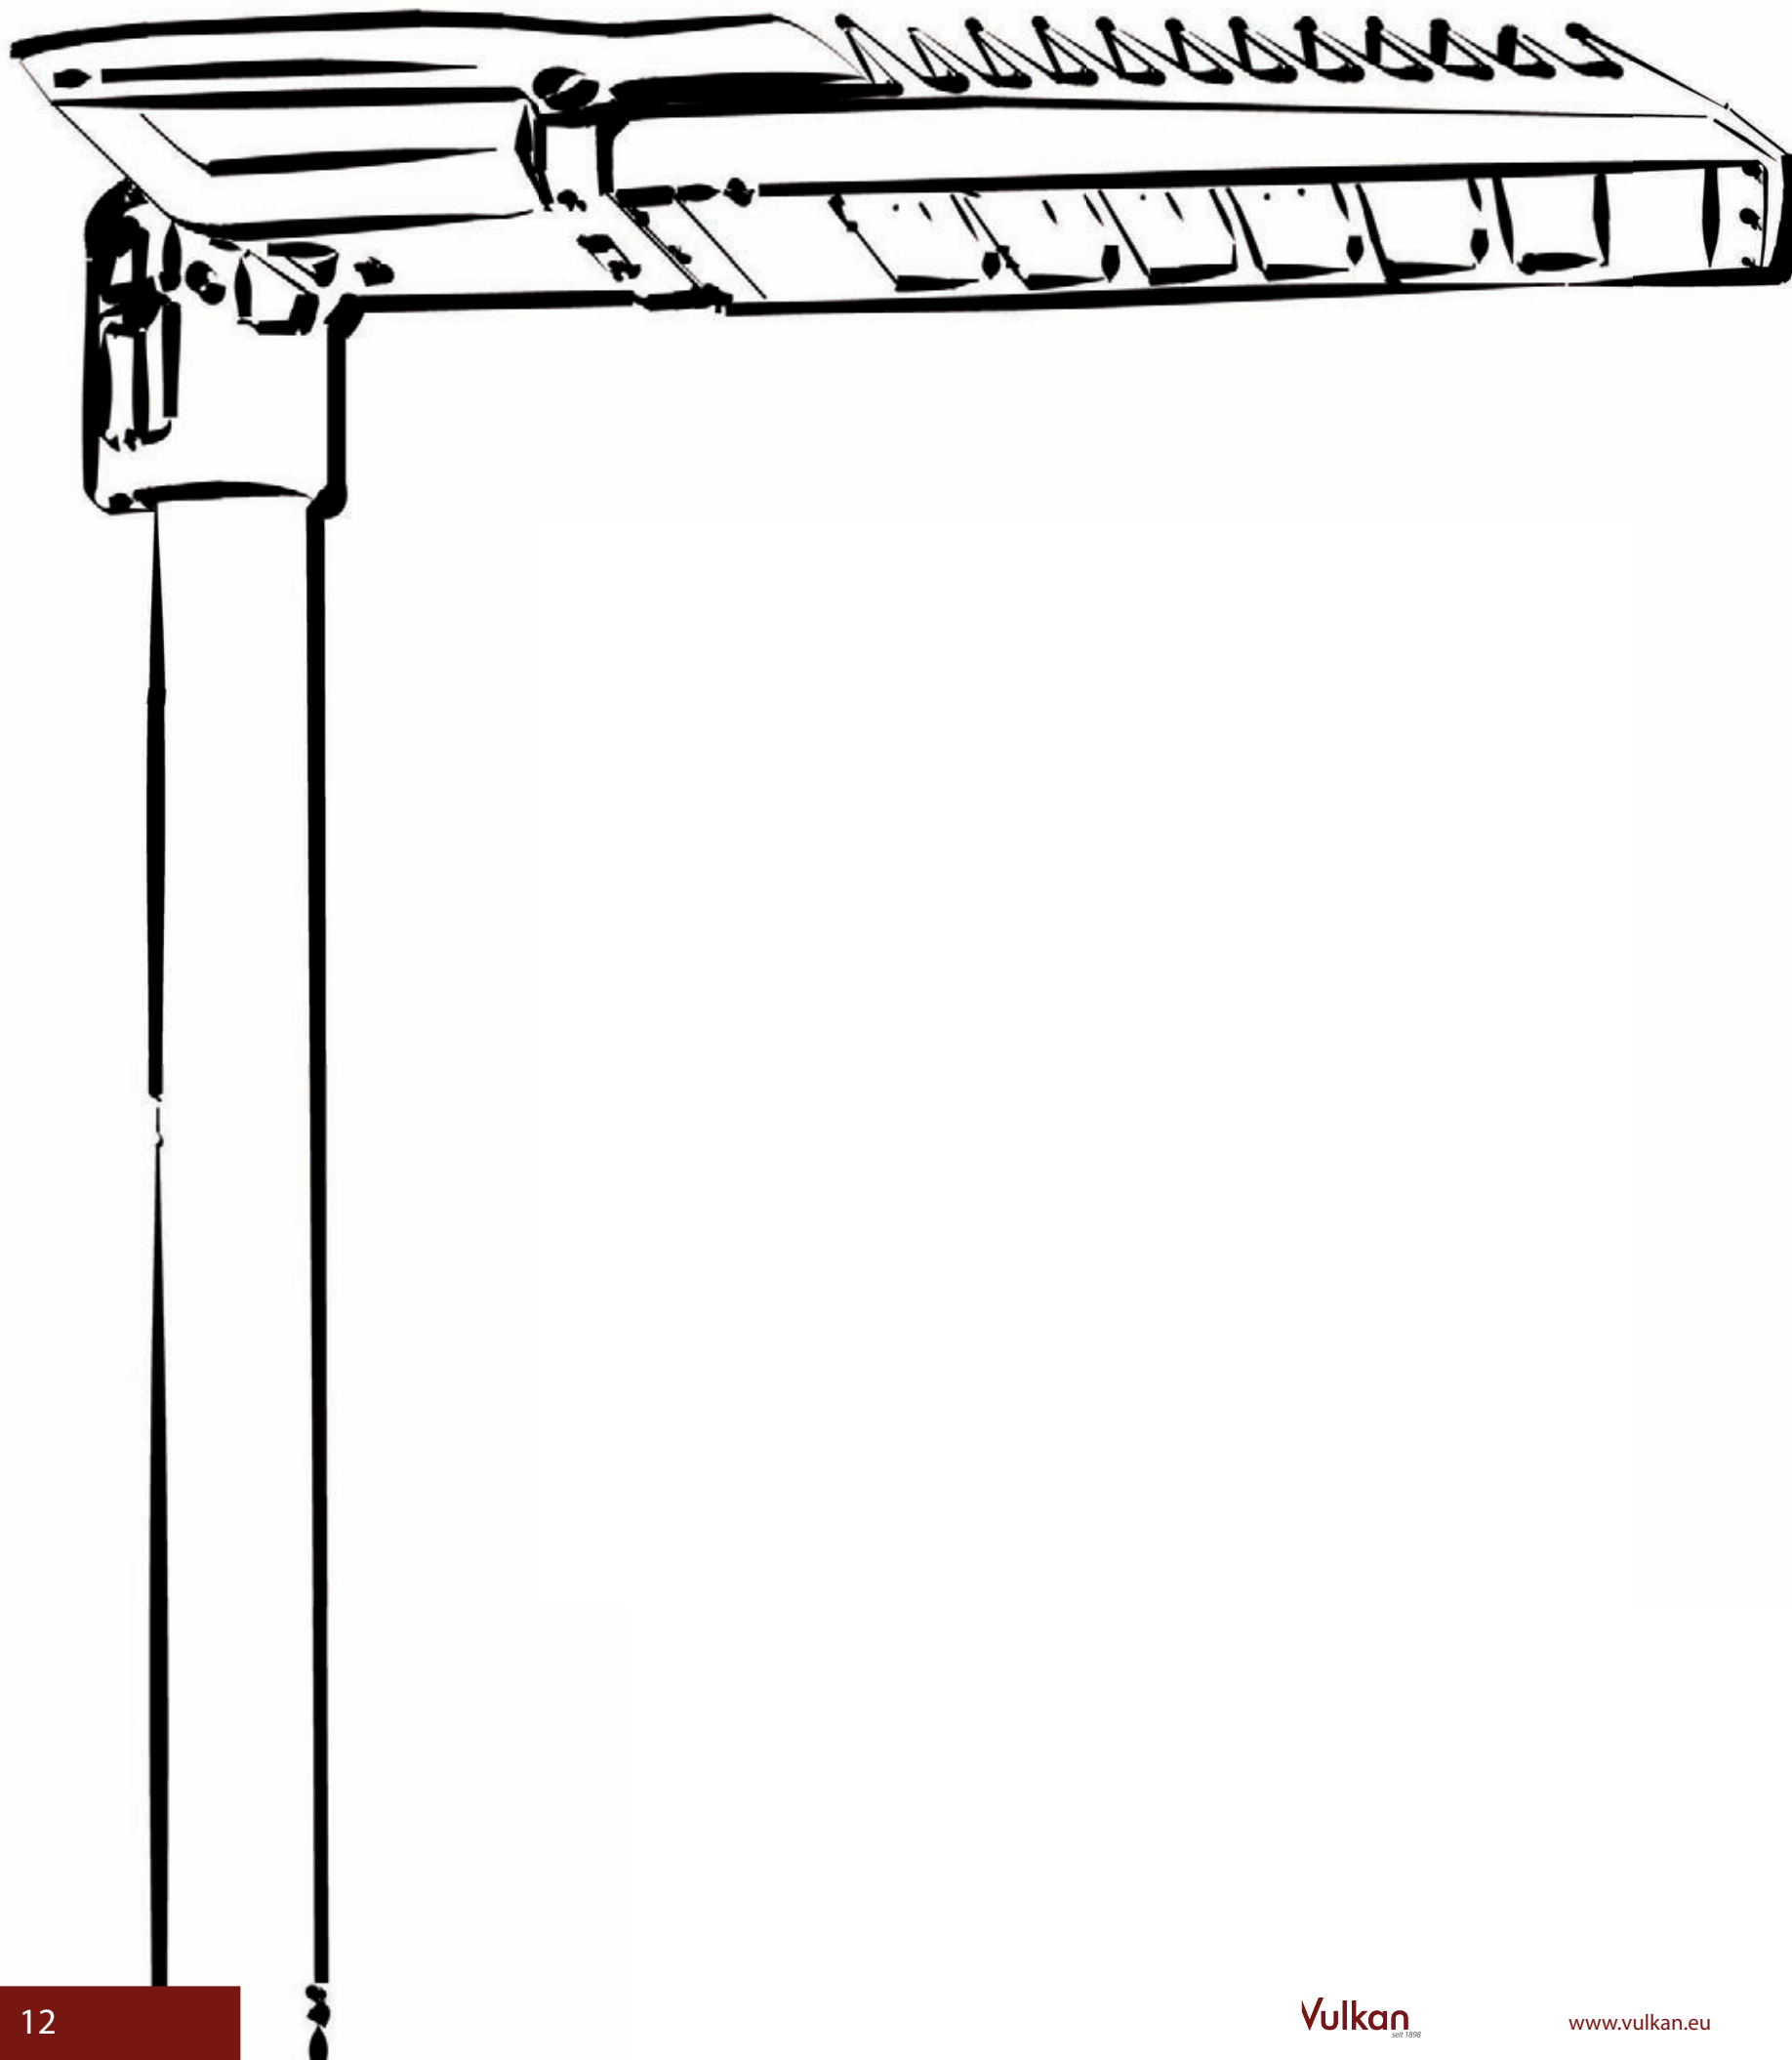

Easy and quick release with a 90° fastener

Flexibility for post top and side entry installation, with tilt adjustment

Detailed product information may be obtained on the Internet or via our employees.

V3660 LED

Flexibility organized!

You need flexibility?
We offer flexibility in equipment,
flexibility in installation, flexibi-
lity in adjustment.

Flexibility all around -
Typically Vulkan.

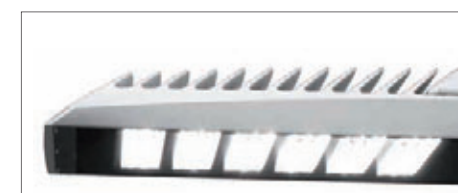

V3660 LED

Flexible pole fixation with tilt adjustment

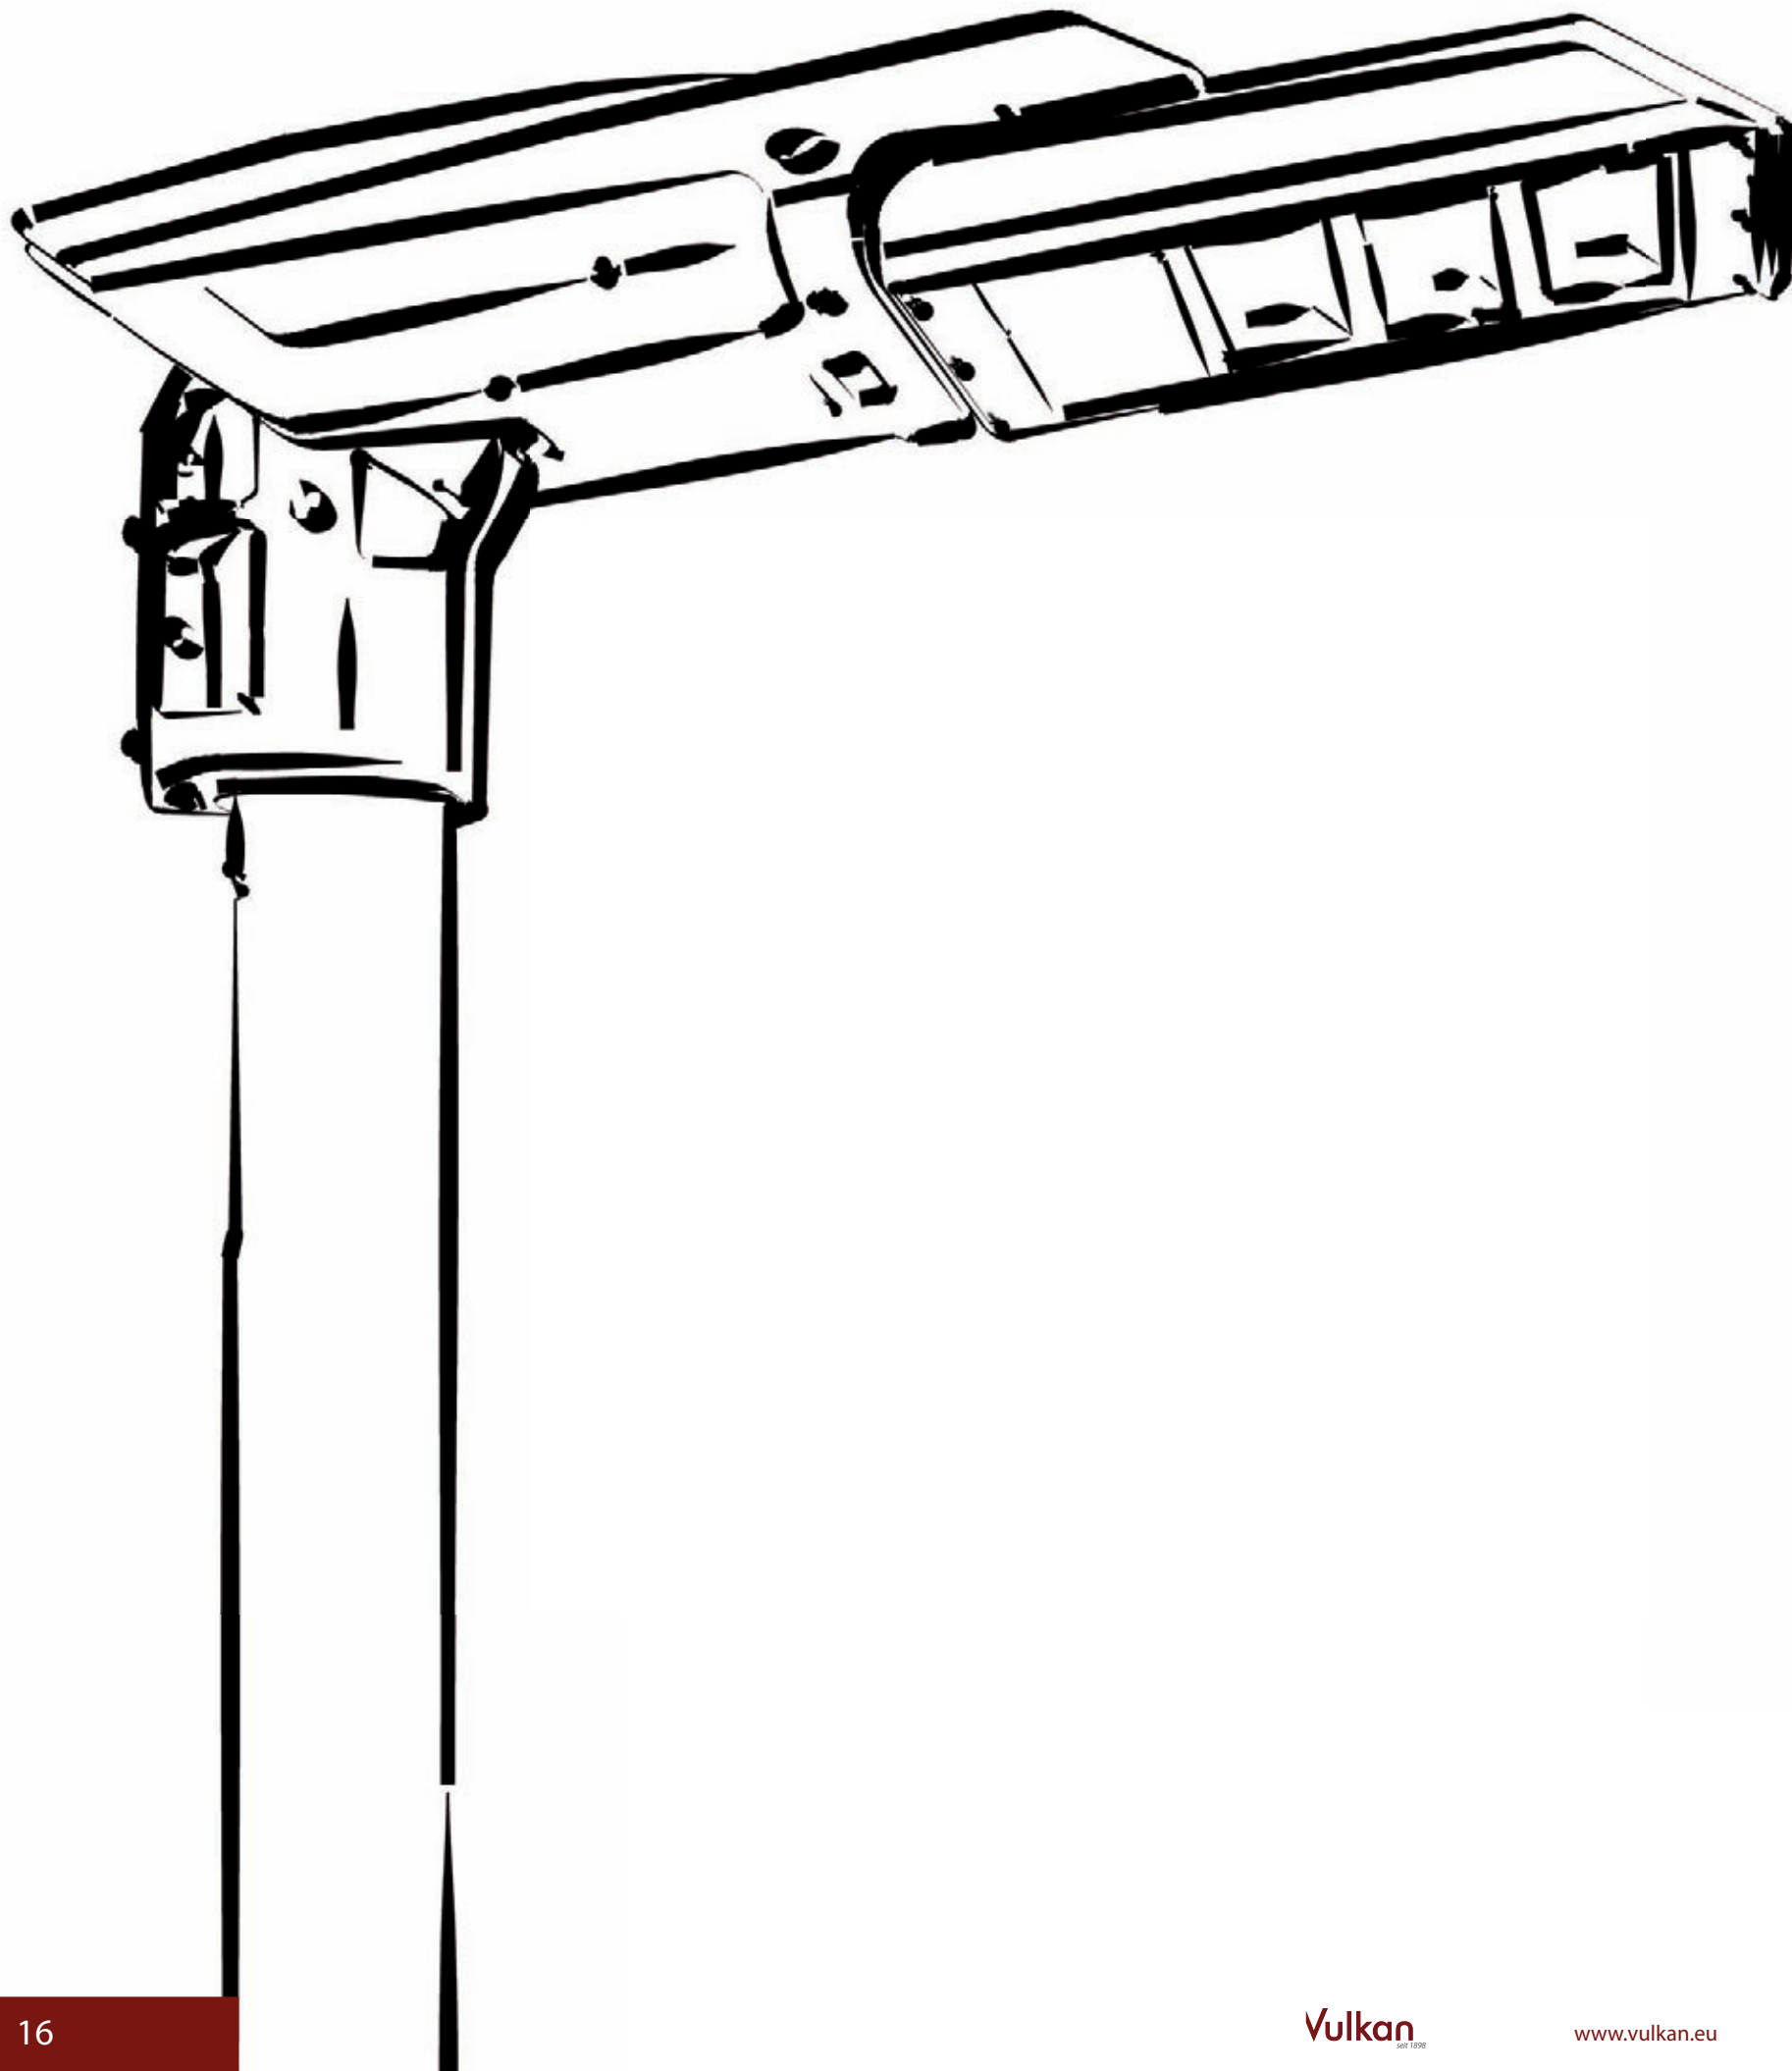

Efficient heat management

Efficient reflector technology for glare reduction

Detailed product information may be obtained on the Internet or via our employees.

V3670 LED

Flexibility organized - and the whole to the power 2!

With additional energy-saving features, we increase the efficiency of our luminaires and ensure illumination always adapted to the situation.

Flexibility² –
Typically Vulkan.

V3670 LED

Efficient reflector technology
for glare reduction

Modular housing - One design

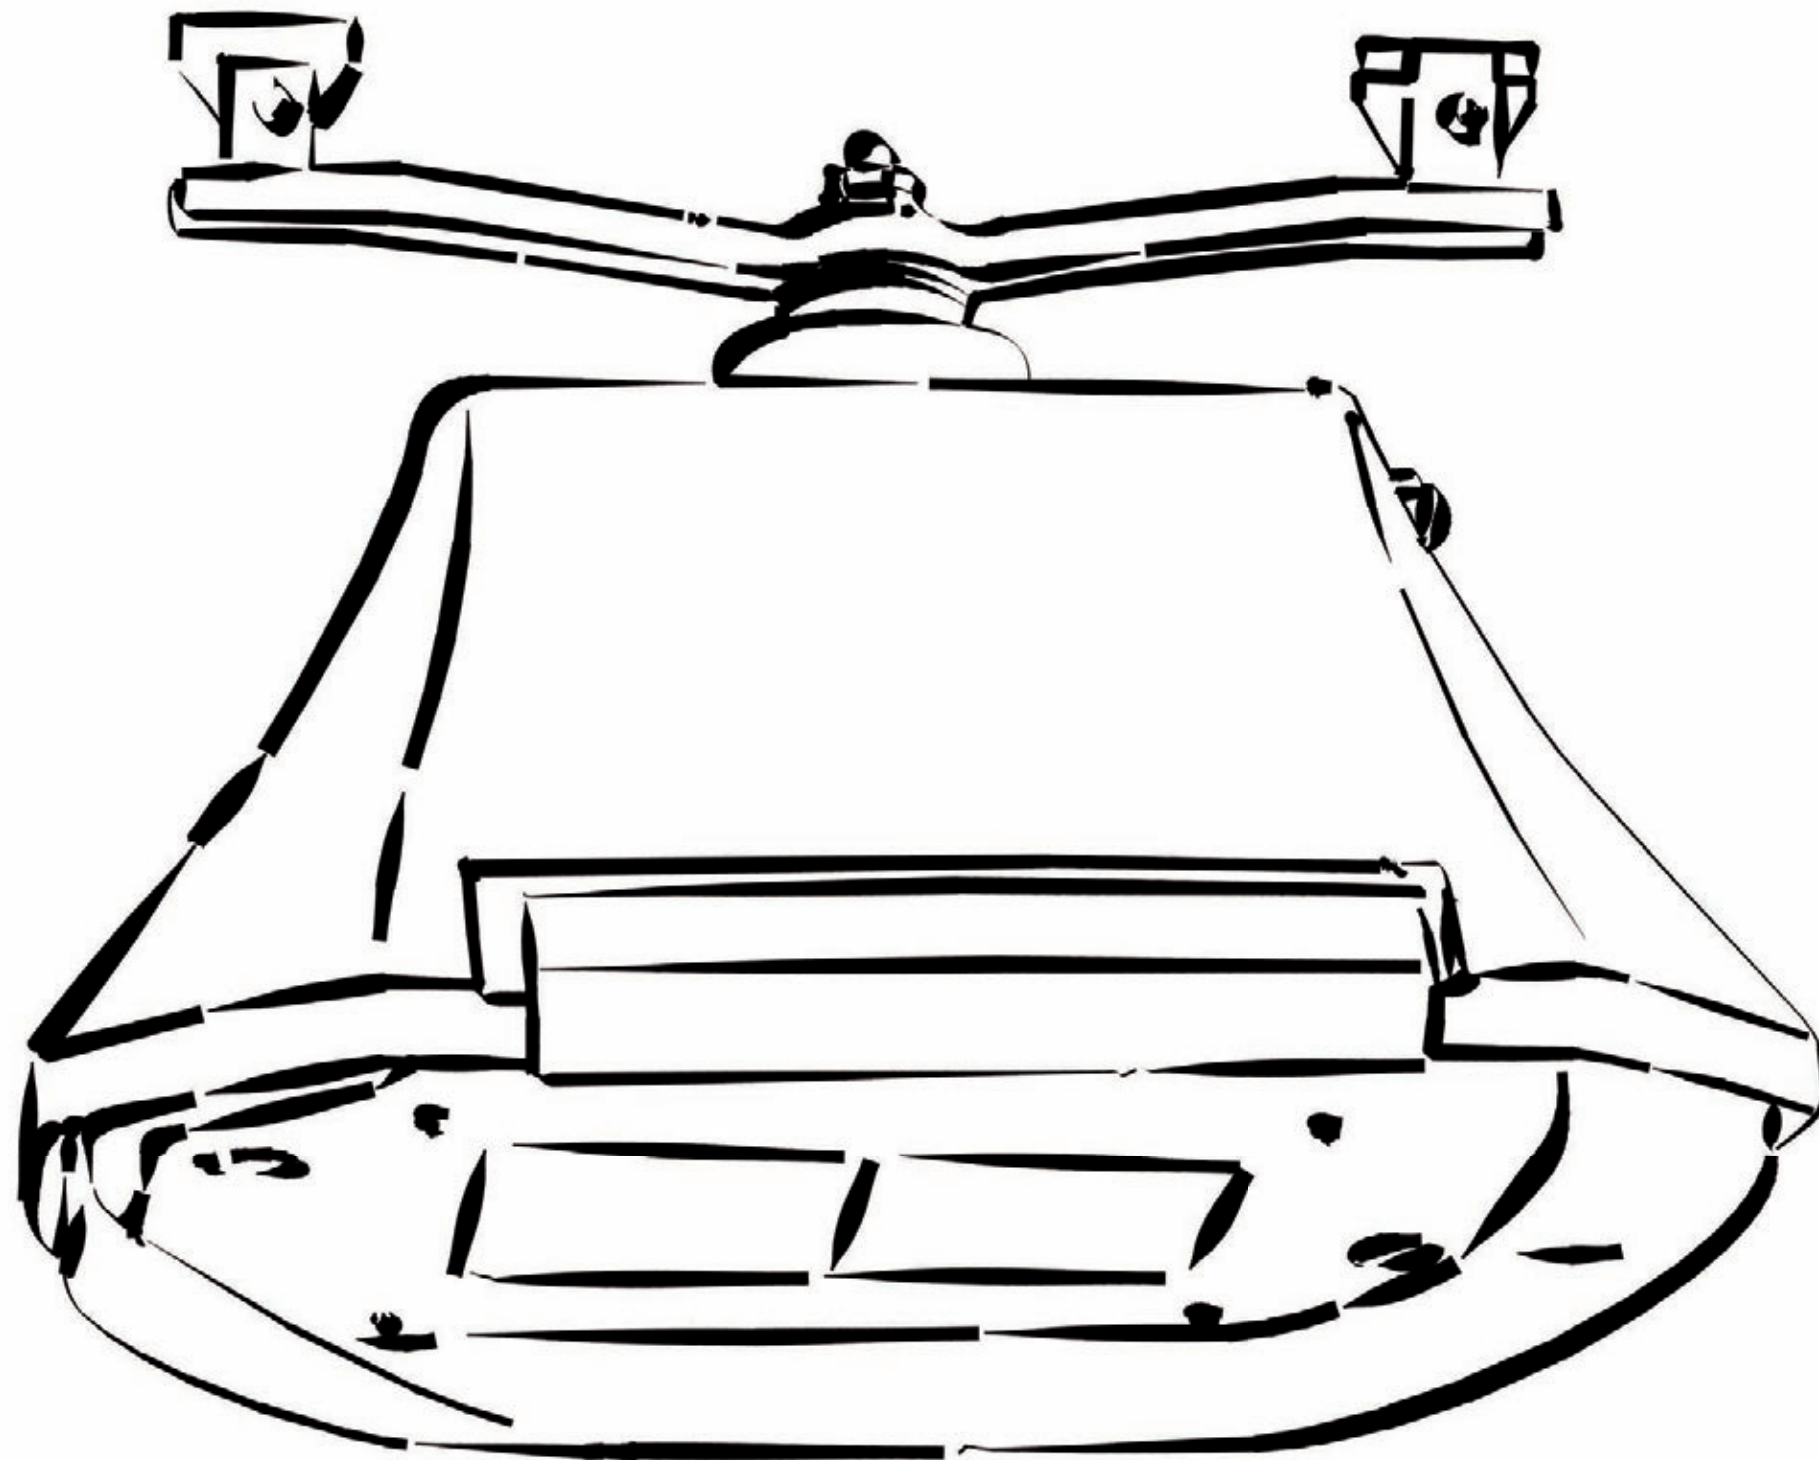

Flexible pole fixation with tilt
adjustment

Detailed product information may be obtained on the Internet or via our employees.

Catenary luminaires V3120

V3120 LED

Light – wherever you like!

Yes, indeed!

We ensure at all times standardized lighting and illumination. With the maximum efficiency.

Light – Efficient and everywhere – Typically Vulkan.

V3120 LED

Adjustable robust cable fixation

Tool-free opening with captive fasteners

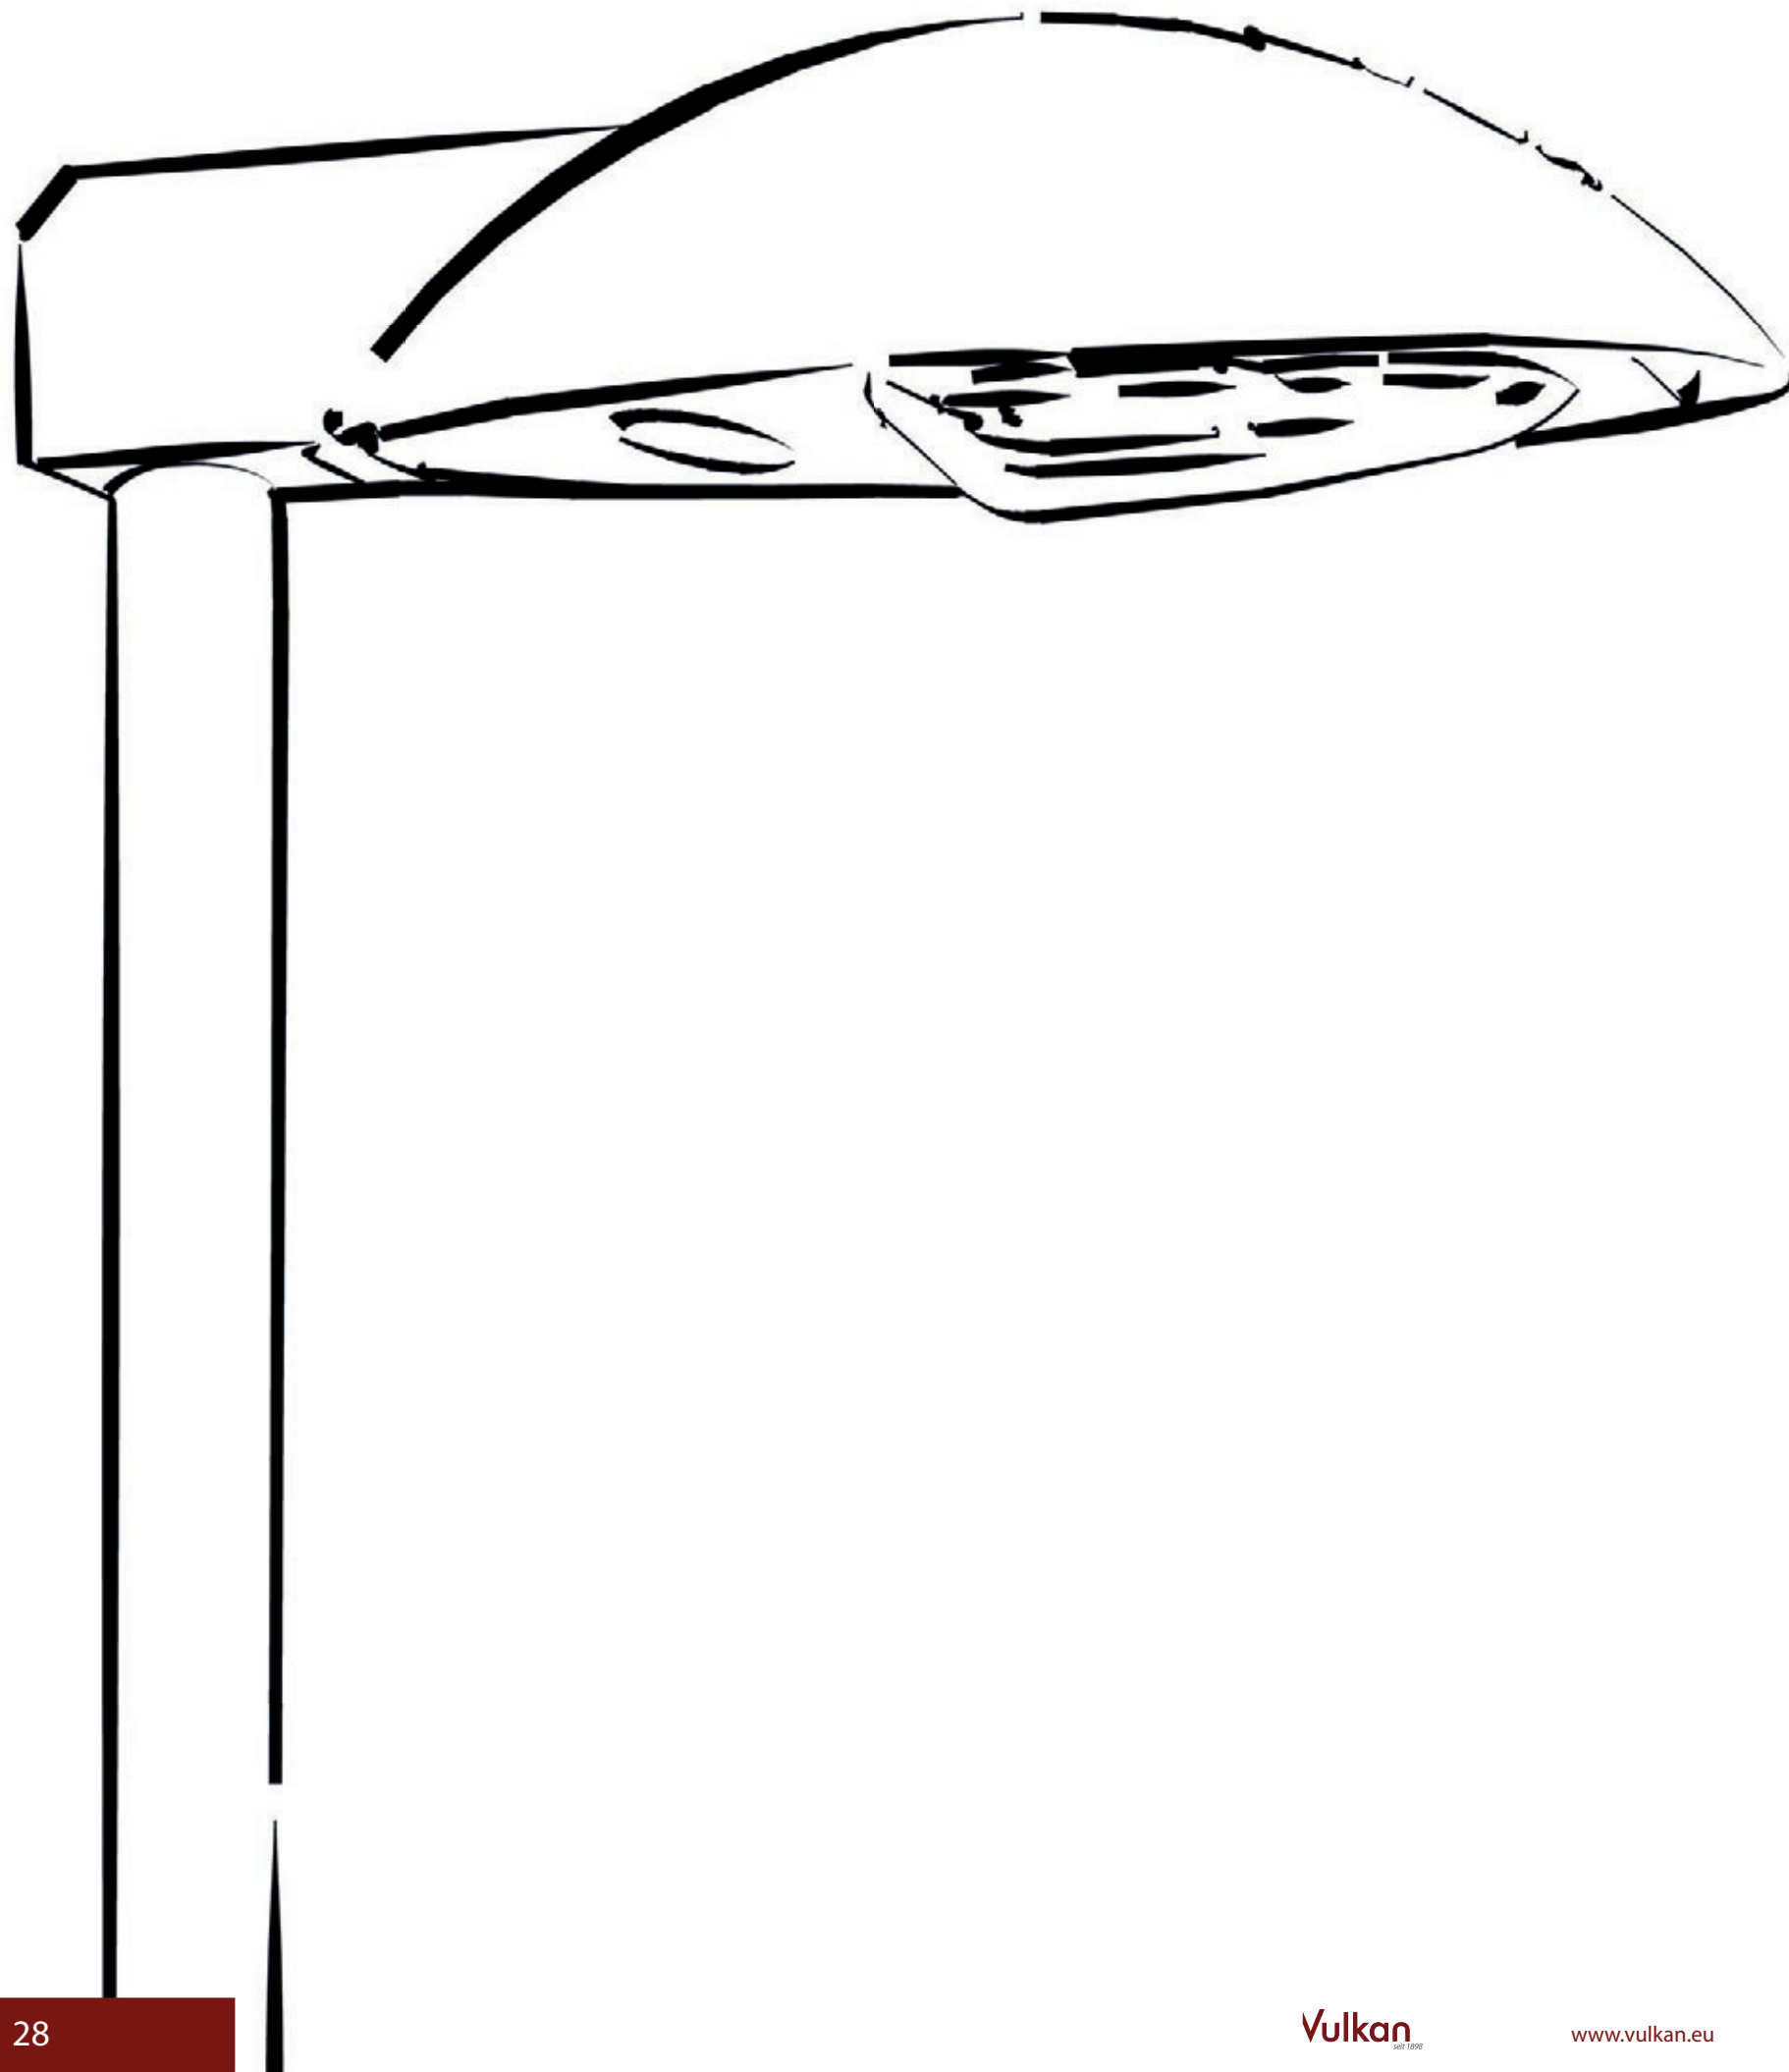

LED modules with effective lens optics for optimal illumination

Detailed product information may be obtained on the Internet or via our employees.

Decorative technical luminaires V3030

V3030 LED

Function and design.

We combine the advantages of a technical luminary with timeless design:

- Die-cast aluminum
- Quick-change kit
- Highly efficient LEDs
- Various adjustments
- Post top or side entry

Technically functional -
and design-oriented -
Typically Vulkan.

V3030 LED

Tool-less and quick access
with 90° fastener

V3028 - The same elegant
design in a smaller housing
available

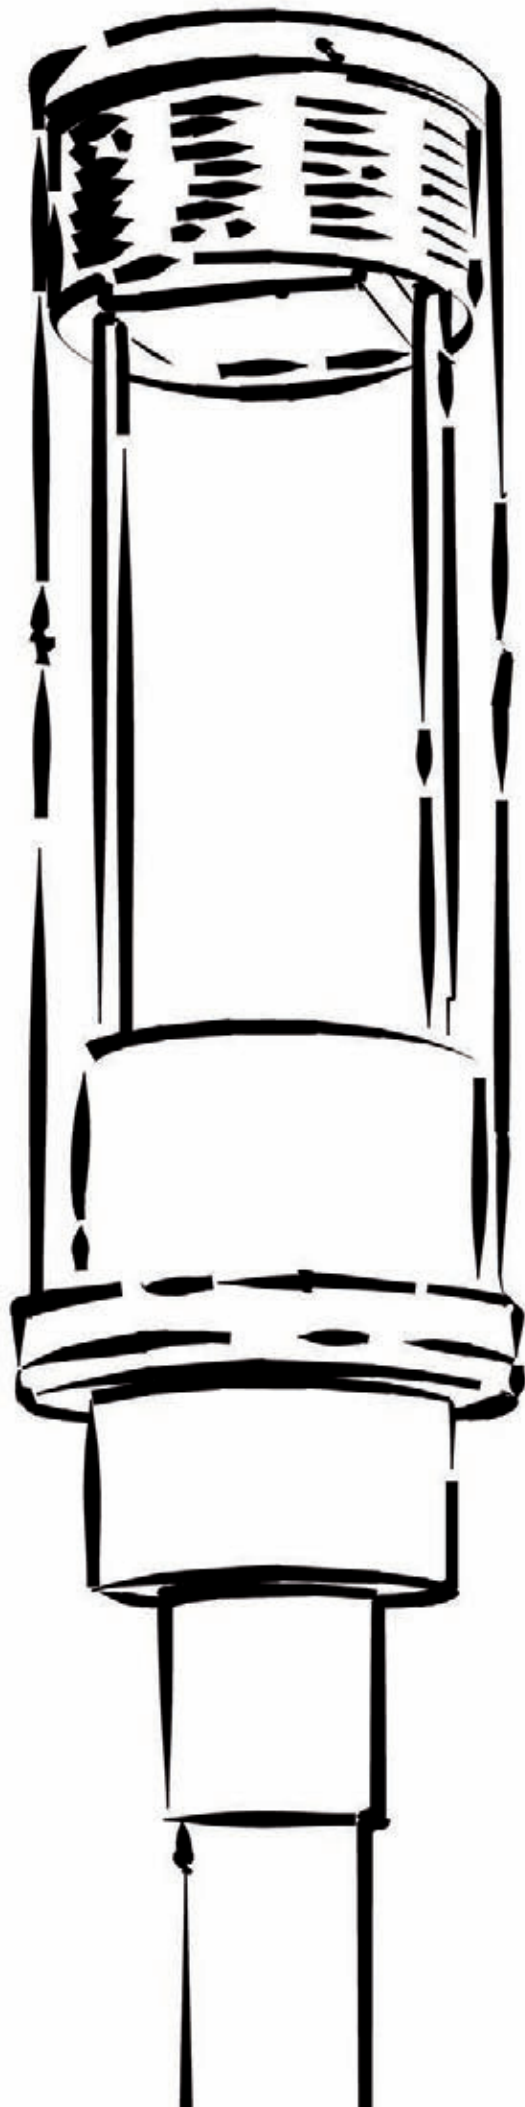

Efficient and changeable
LED-modules with different
optics

Detailed product information may be obtained on the Internet or via our employees.

Cylindrical luminaires V3456

V3450 LED

Stylistic design -
first-class technology!

Decorative and elegant.
Powerful and efficient.
Many possibilities and low
maintenance.

Elegant and powerful -
Typically Vulkan.

V3450 LED

Static secure three-point pole fixation made for 76mm poles

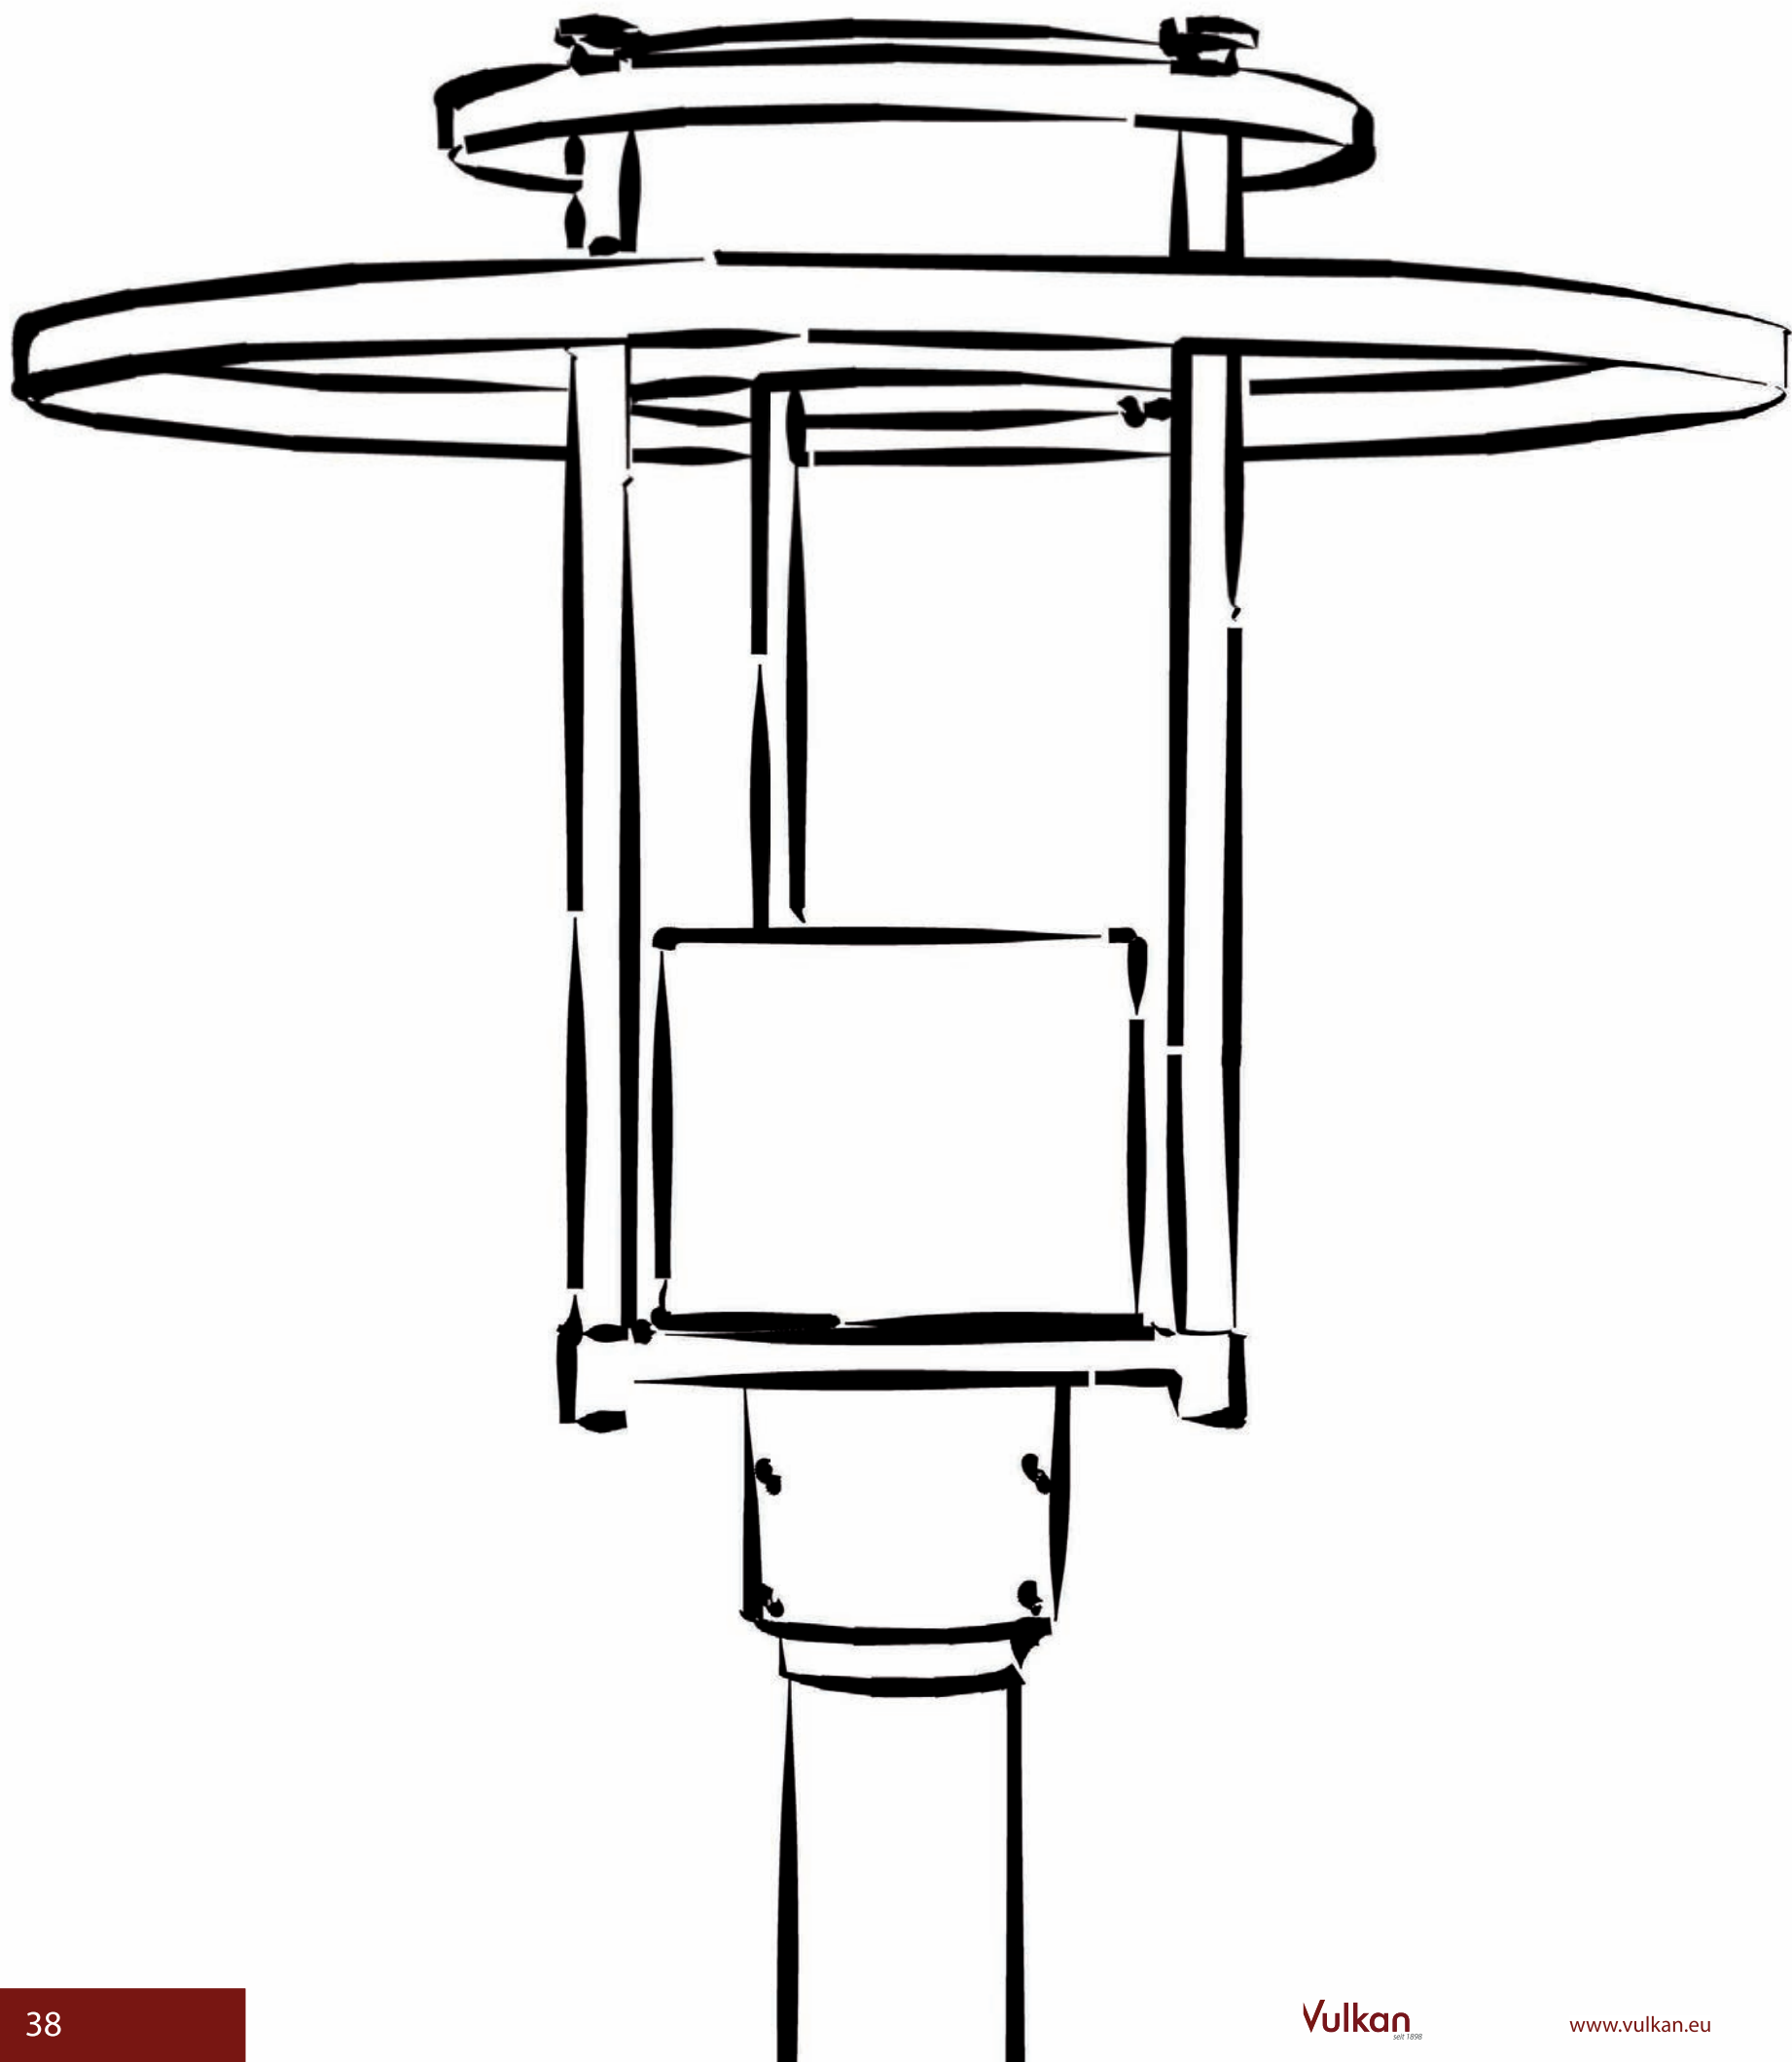

Highly efficient aluminum core LED-modules, easy to replace if necessary

Design and light source miniaturization

Detailed product information may be obtained on the Internet or via our employees.

V3456 LED

Clear design – easy to use!

An impressive clear design meets an equally impressive ease of use. We focus not only on the design of a luminaire, but also on the ease of use. One does not exclude the other.

In summary:
Clarity and simplicity in perfection -
Typically Vulkan.

V3456 LED

Static secure three-point pole fixation made for 76mm poles

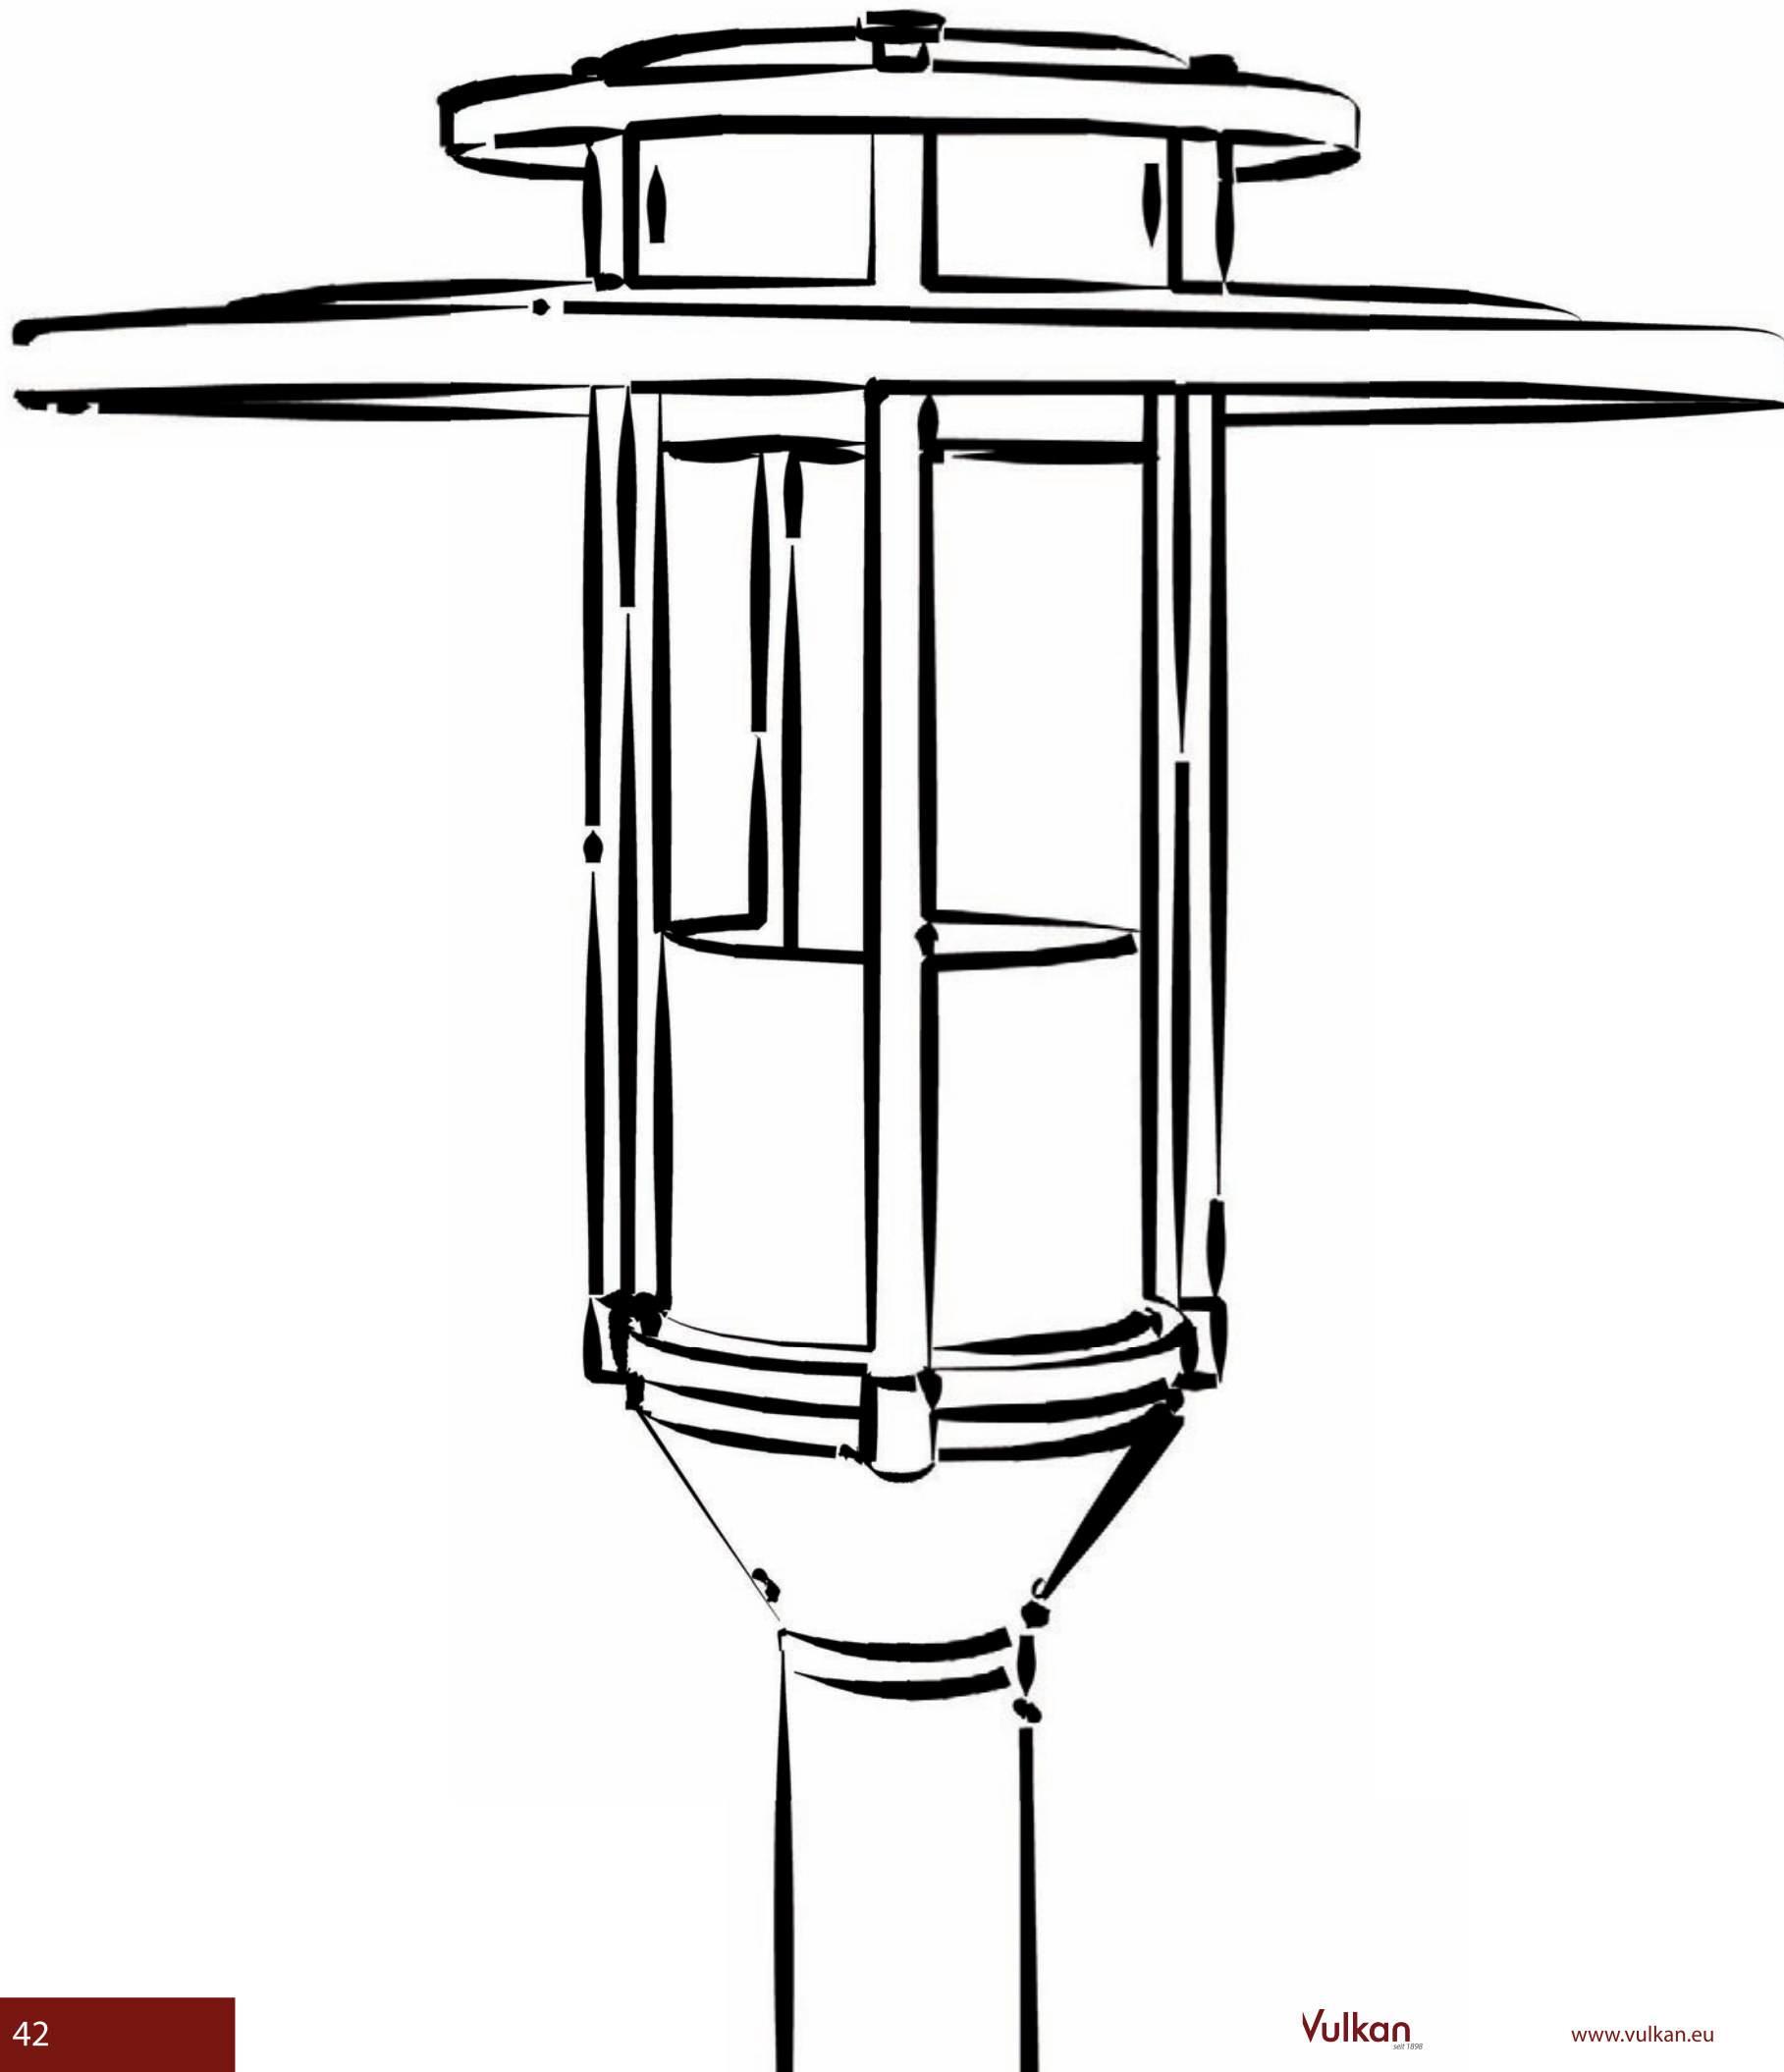

Replaceable LED modules with different optics

Elegant and subtle

Detailed product information may be obtained on the Internet or via our employees.

V3457 LED

Quality - and more!

Even the standard solution of Vulkan luminaires ensure technically and visually a high quality. And from us you can expect even more.

By using high-quality materials and high-quality coatings, the quality of the luminaire can be increased visibly and tangibly.

As a result we transform an already good product into an exclusive solution.

Exclusivity -
Typically Vulkan.

V3457 LED

Static secure three-point pole mounting made for 76mm poles

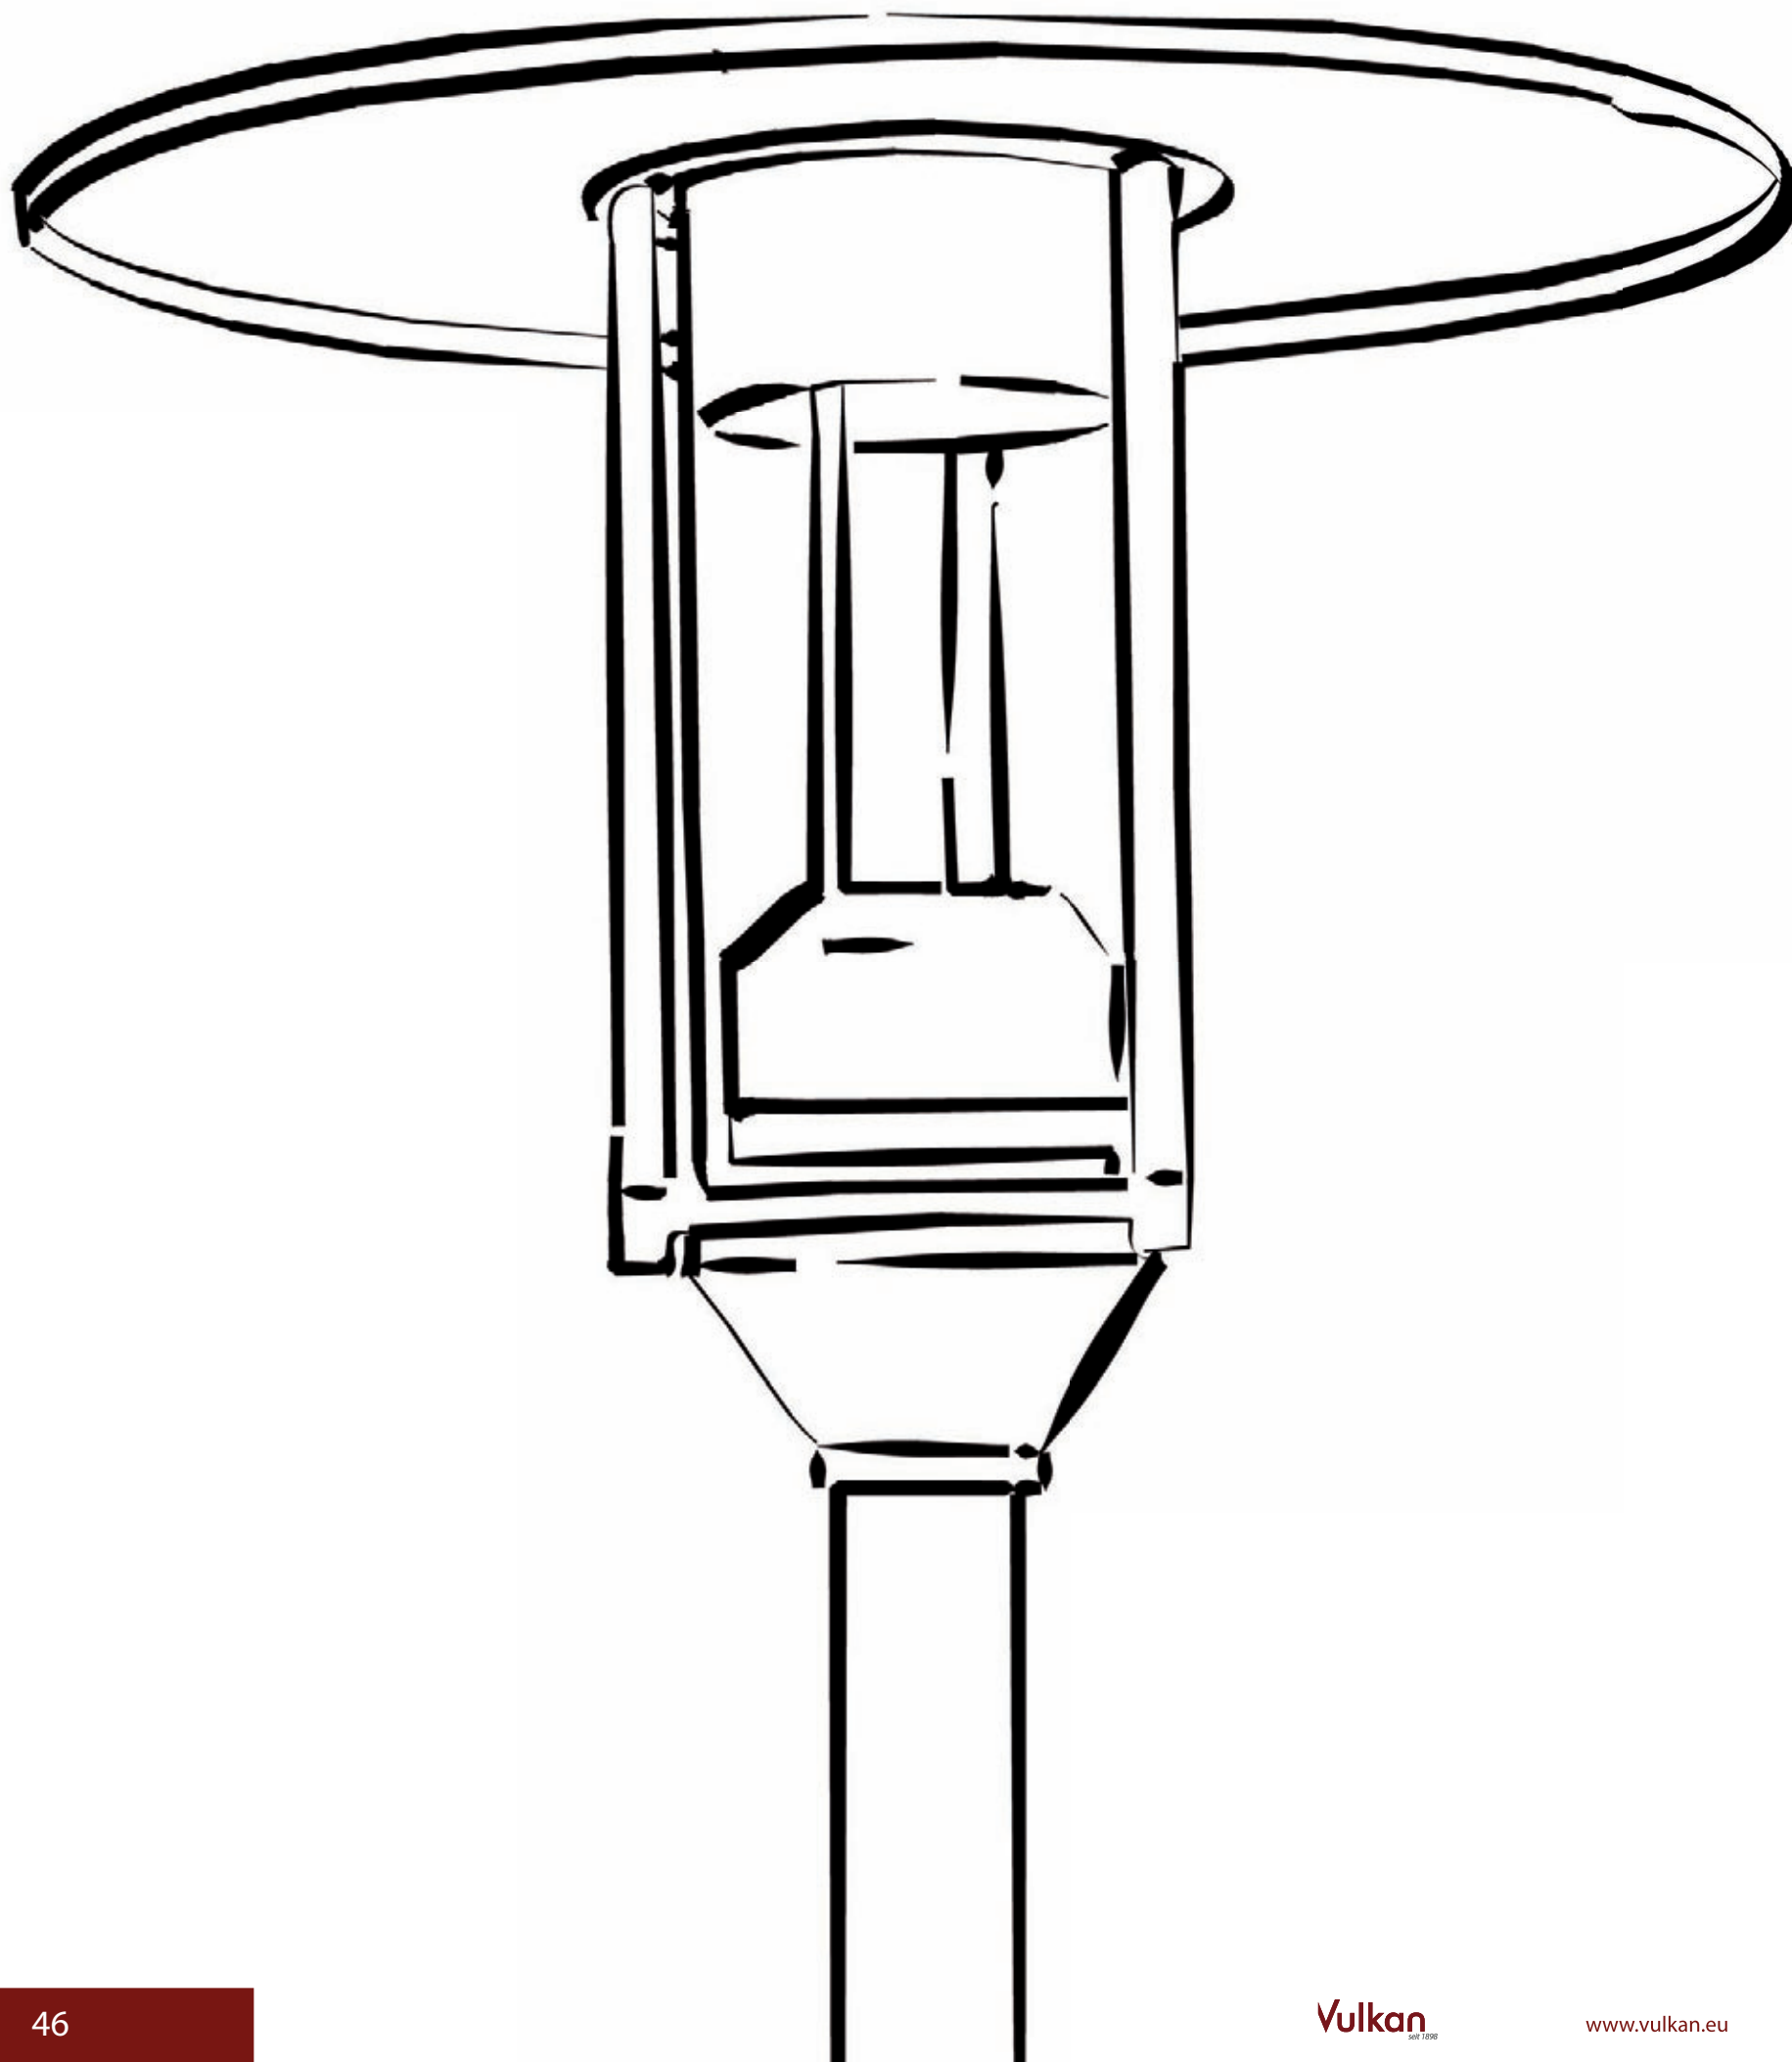

Highly efficient aluminum core LED-modules, easy to replace if necessary

Efficiency in combination with design

Detailed product information may be obtained on the Internet or via our employees.

V3458 LED

Lighting technology - the heart
of our luminaires!

Light - wherever you want it!
Light – the way you want it!

At the same time with maximum
efficiency.

The light – from Vulkan!

V3458 LED

Static secure three-point pole fixation made for 76mm poles

Highly efficient aluminum core LED-modules, easy to replace if necessary

Elegance can be effective as well

Detailed product information may be obtained on the Internet or via our employees.

Light columns V6220

V6220 LED

Light columns – Eye-catching during day and night!

Do you want a real eye-catcher?

The stylistic design and the choice between different kinds of glass covers make your city more attractive by day, as well as by night.

To attract attention.
By day and by night.

Light columns – from Vulkan.

V6220 LED

Attractive by day and by night

Highly efficient aluminum core LED-modules, easy to replace if necessary

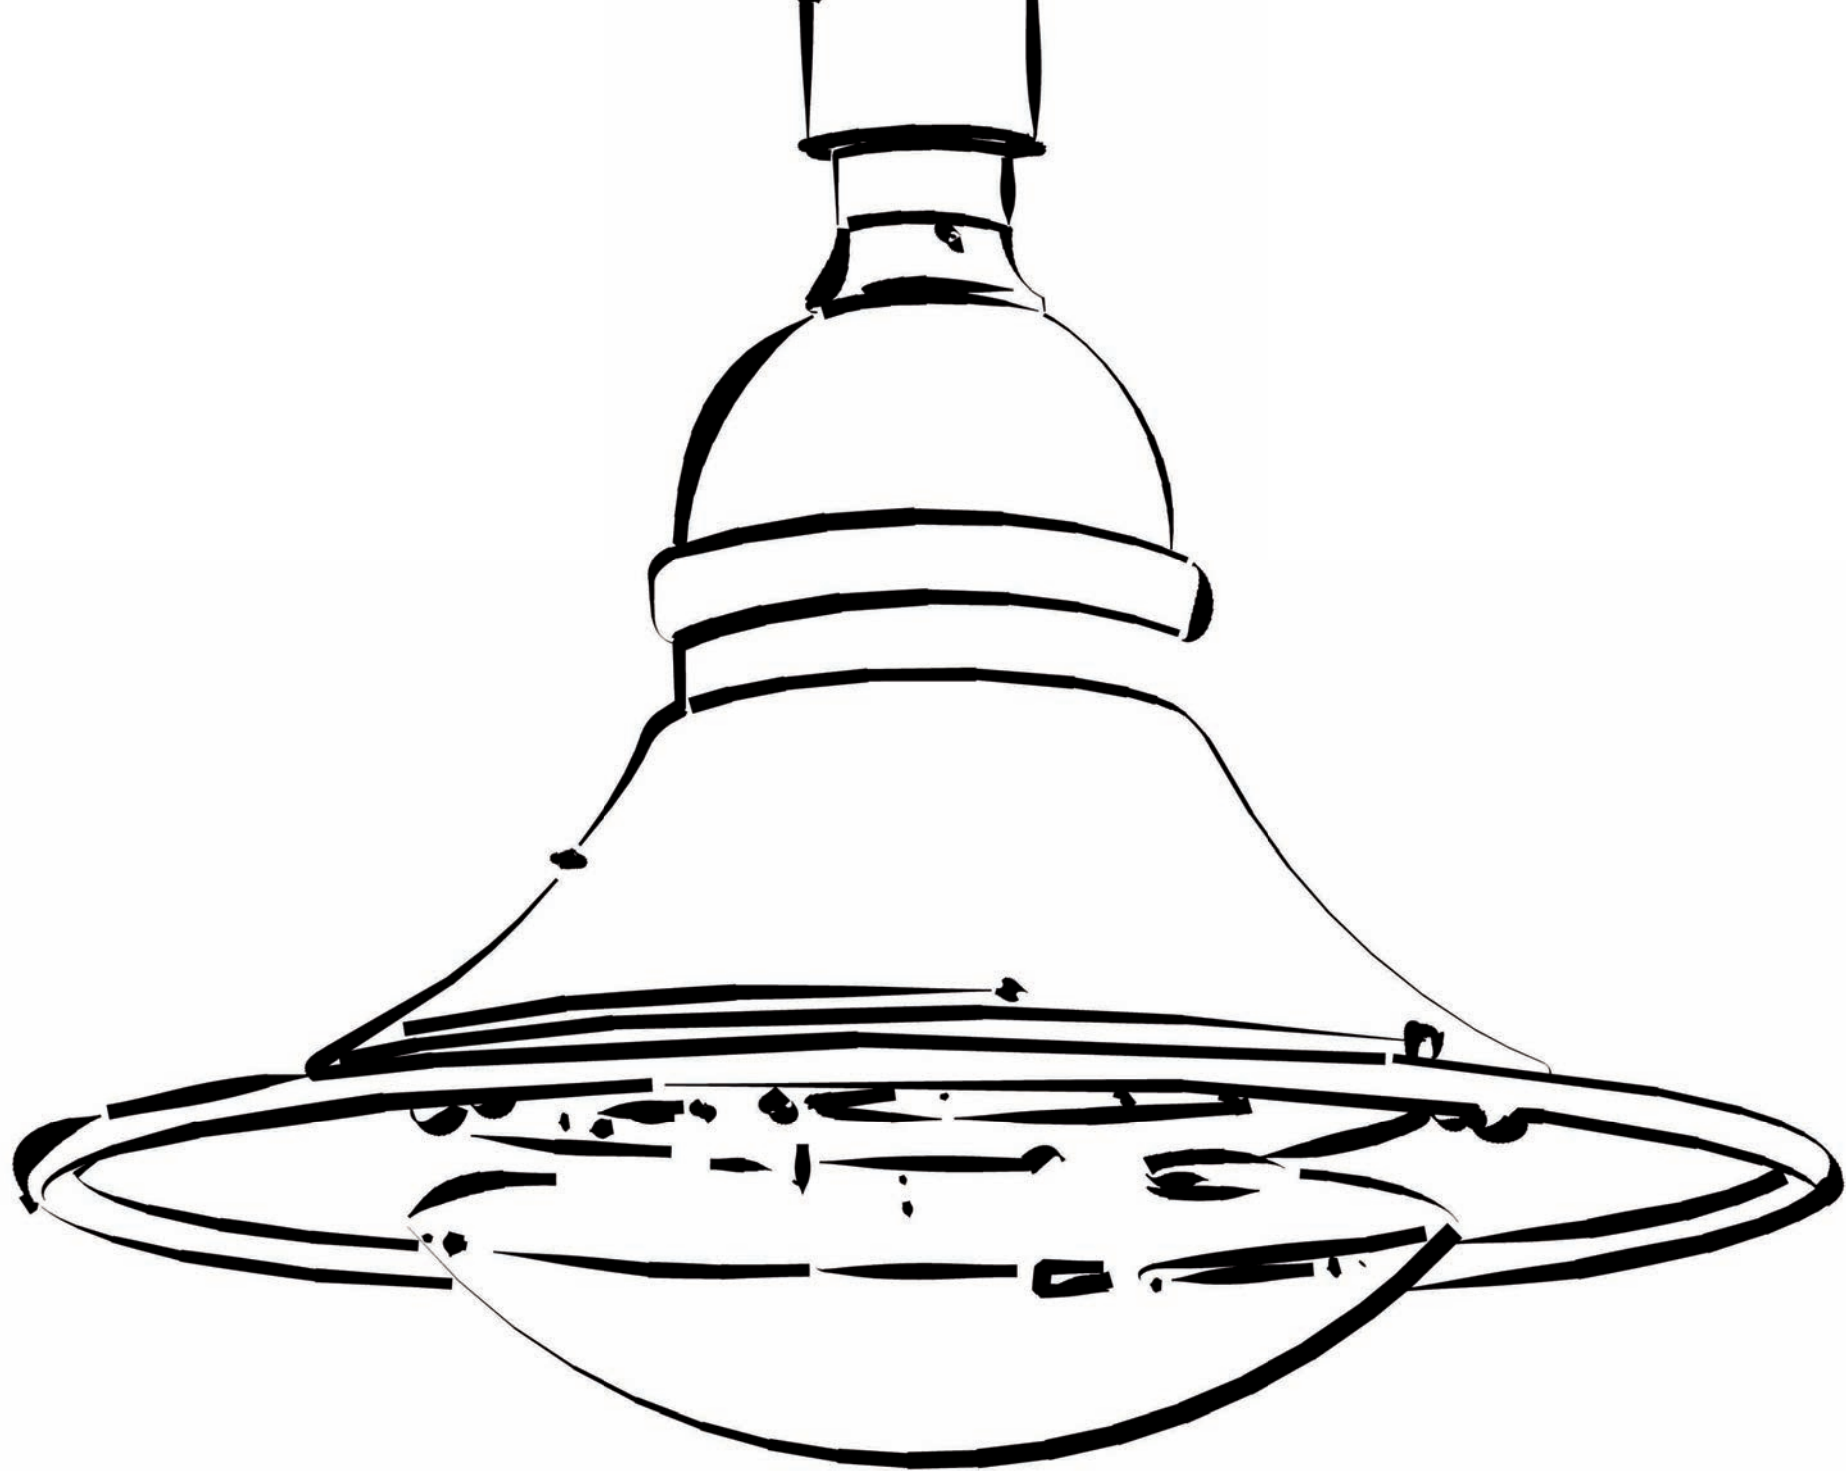

Even more effective with clear glass covers and just as attractive

Detailed product information may be obtained on the Internet or via our employees.

Bell-shaped luminaires V8450

V8446 LED

The bell-shaped luminary – the classic one!

The bell-shaped luminaire is the classic one in our product portfolio. Not without reason, we offer this luminaire in different variants.

Decide for yourself:
What is your favorite?

Classic design -
Typically Vulkan.

V8446 LED

Safe and easy pole fixation

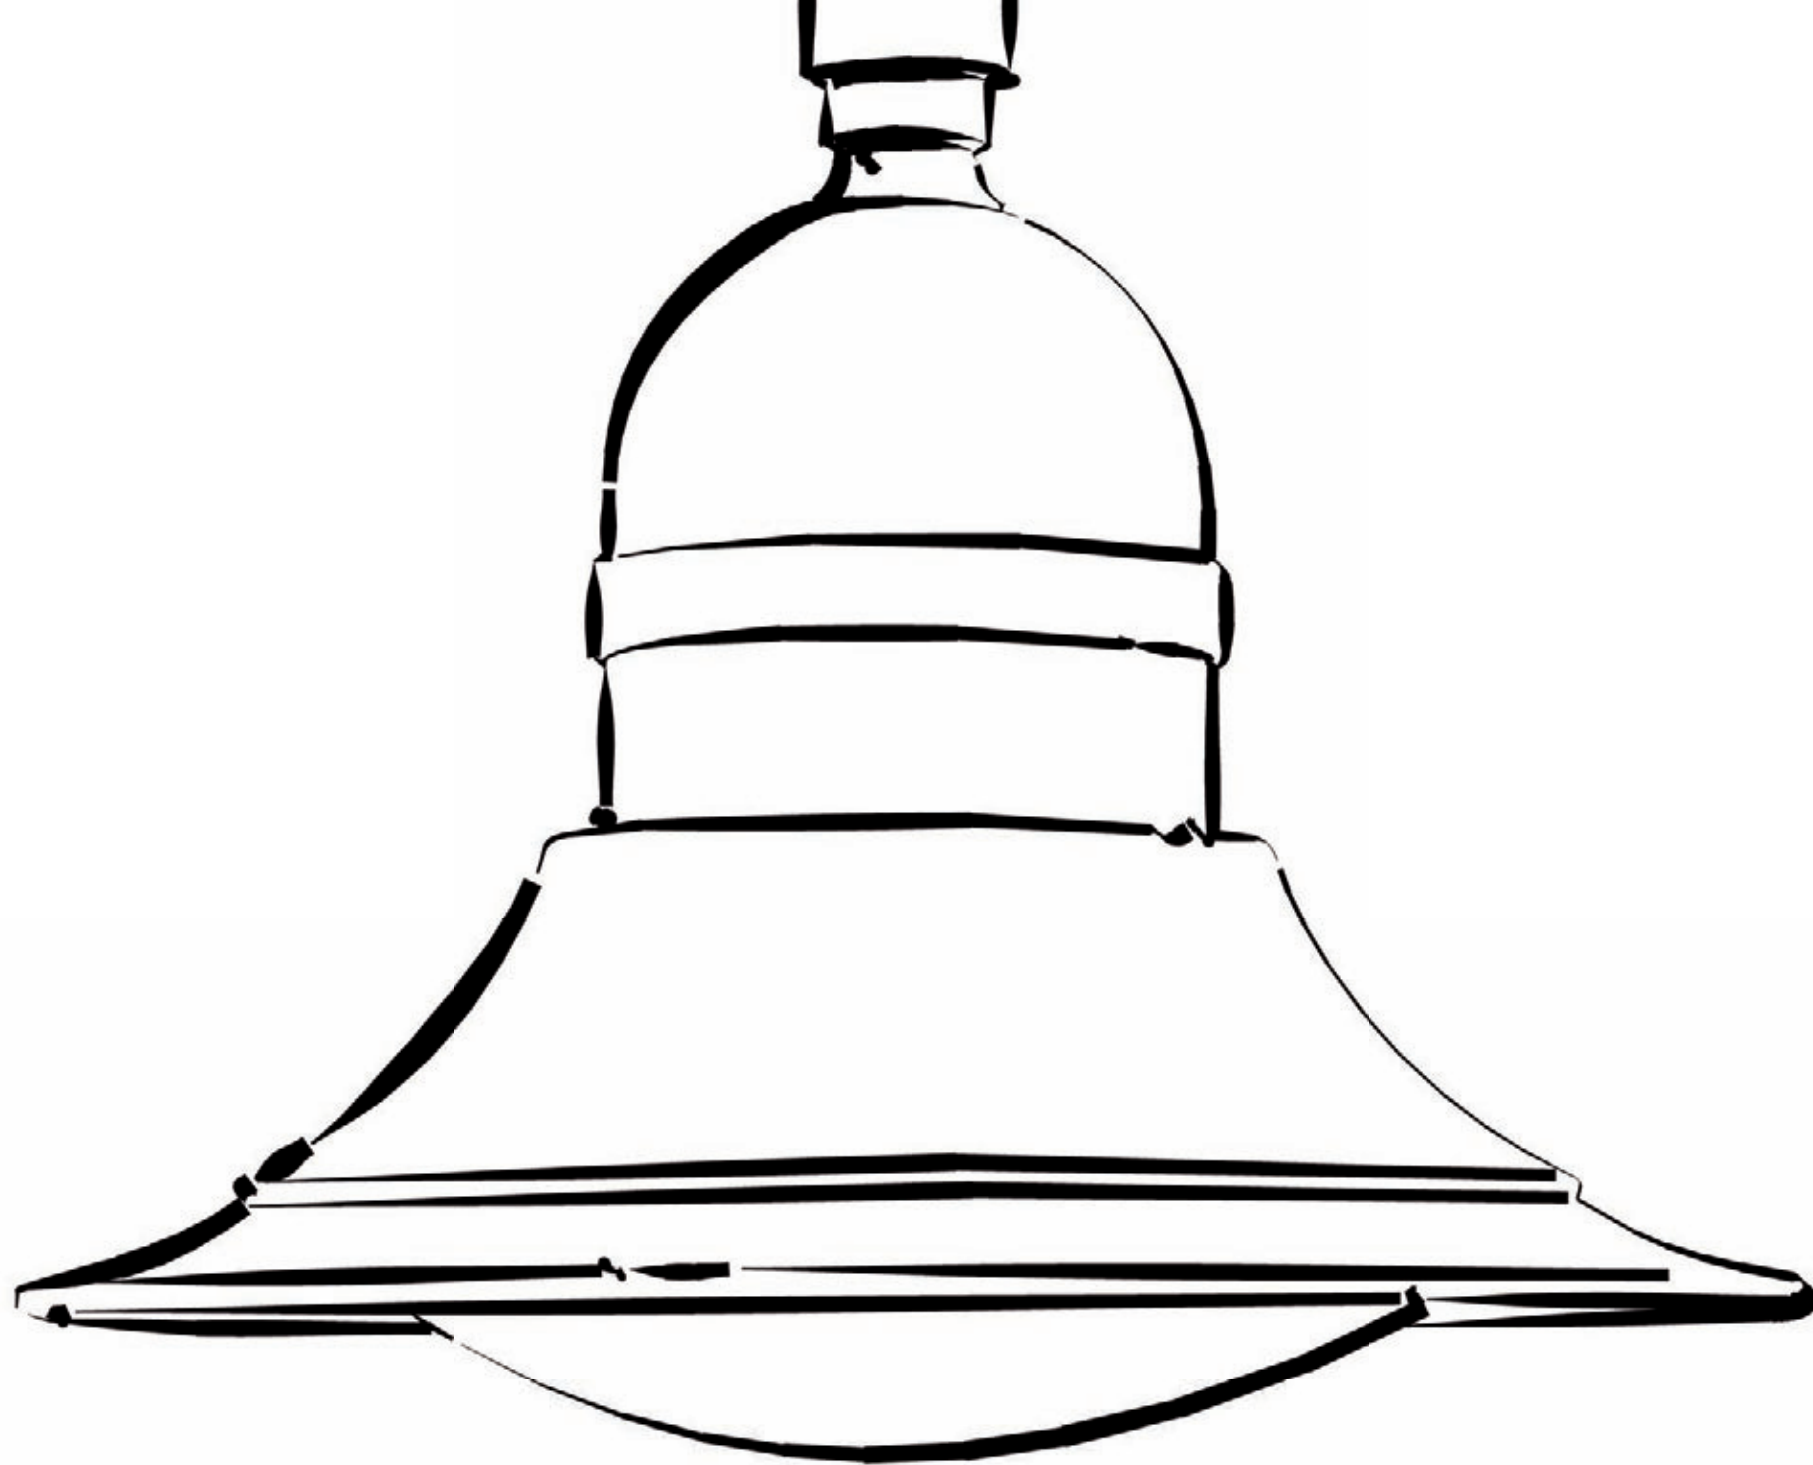

Efficient LED-modules in the familiar classic housing

Fast installation thanks to Vulkan - Patent-System

Detailed product information may be obtained on the Internet or via our employees.

V8447 LED

The bell-shaped luminary –
impressive in form and diversity!

The diversity within the bell-shaped
luminaires' family with its different
side arms is impressive. Therefore,
each luminaire is unique and equip-
ped with the latest lighting techno-
logy.

Shape, variety and technology -
Typically Vulkan.

V8447 LED

Easy and safe pole fixation

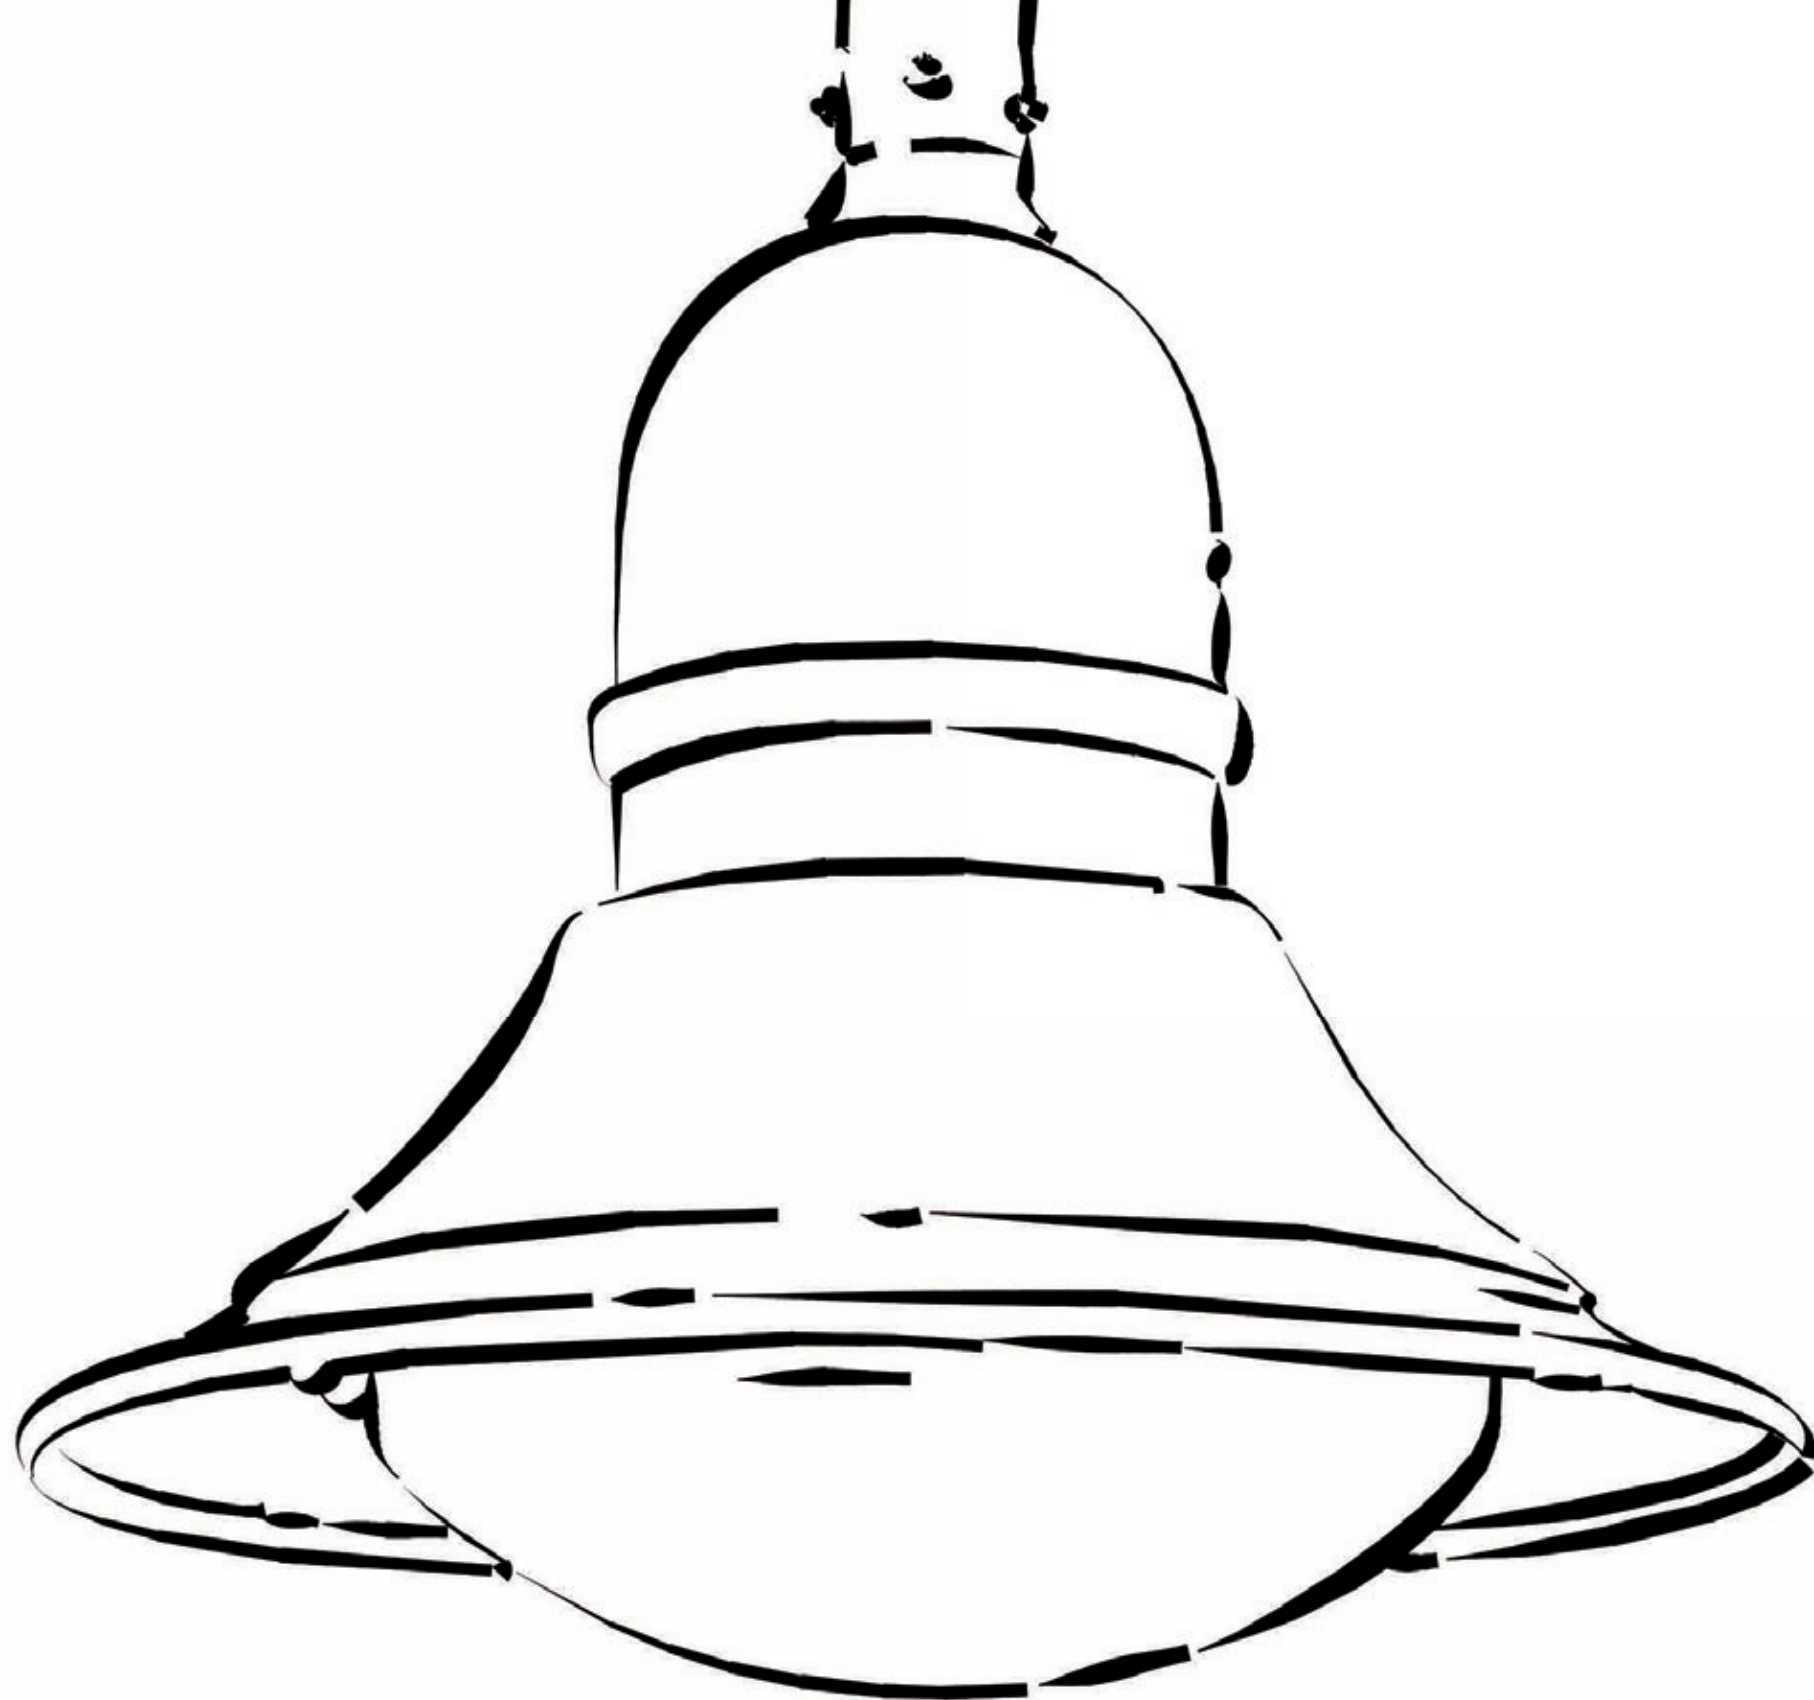

Efficient LED-modules with
different light distribution

Vulkan-Patent-System – fast and
safe

Detailed product information may be obtained on the Internet or via our employees.

V8448 LED

Always a bell-shaped luminaire - but which pole?

By using individual poles and side arms you increase the attractiveness of the classic luminaire and raise the uniqueness of your light installation.

You have the choice - Typically Vulkan.

V8448 LED

Easy and tool-free opening

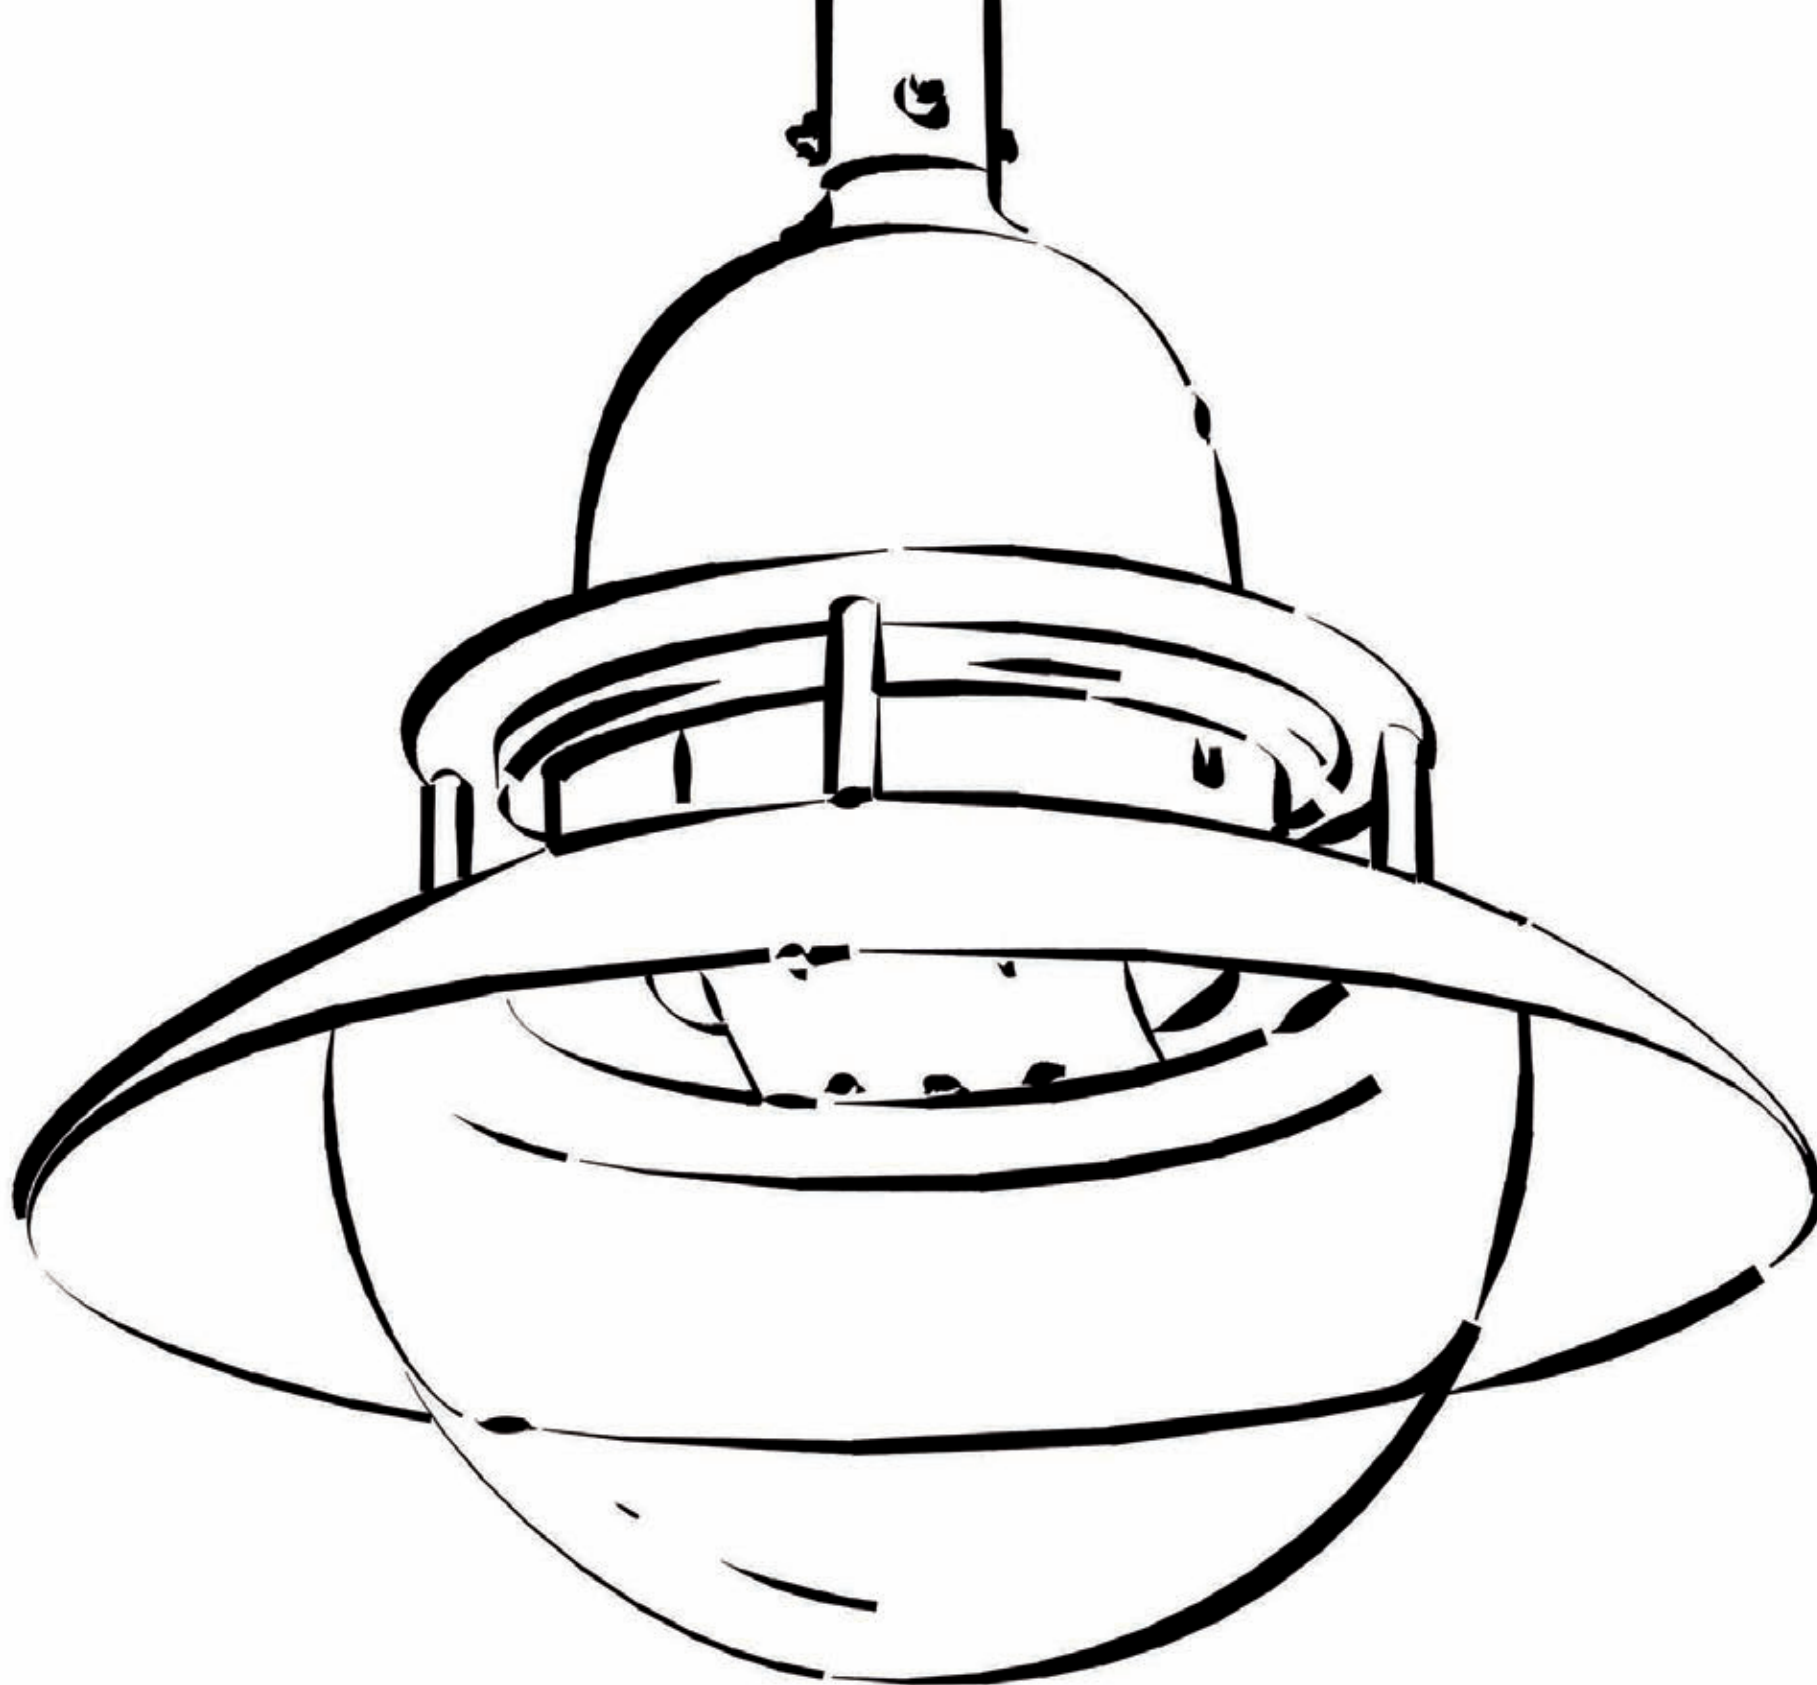

Efficient LED modules in the familiar classical housing

Fast installation thanks to Vulkan-Patent-System

Detailed product information may be obtained on the Internet or via our employees.

V8450 LED

The bell-shaped luminaire –
with impressive Quality!

Our classical luminaire contains
a lot of experience – and thus
lots of quality.

Quality - you guessed.
Quality – that can be felt.
Quality – which can be seen.

Quality in material and light -
Typically Vulkan.

V8450 LED

Easy and quick pole fixation

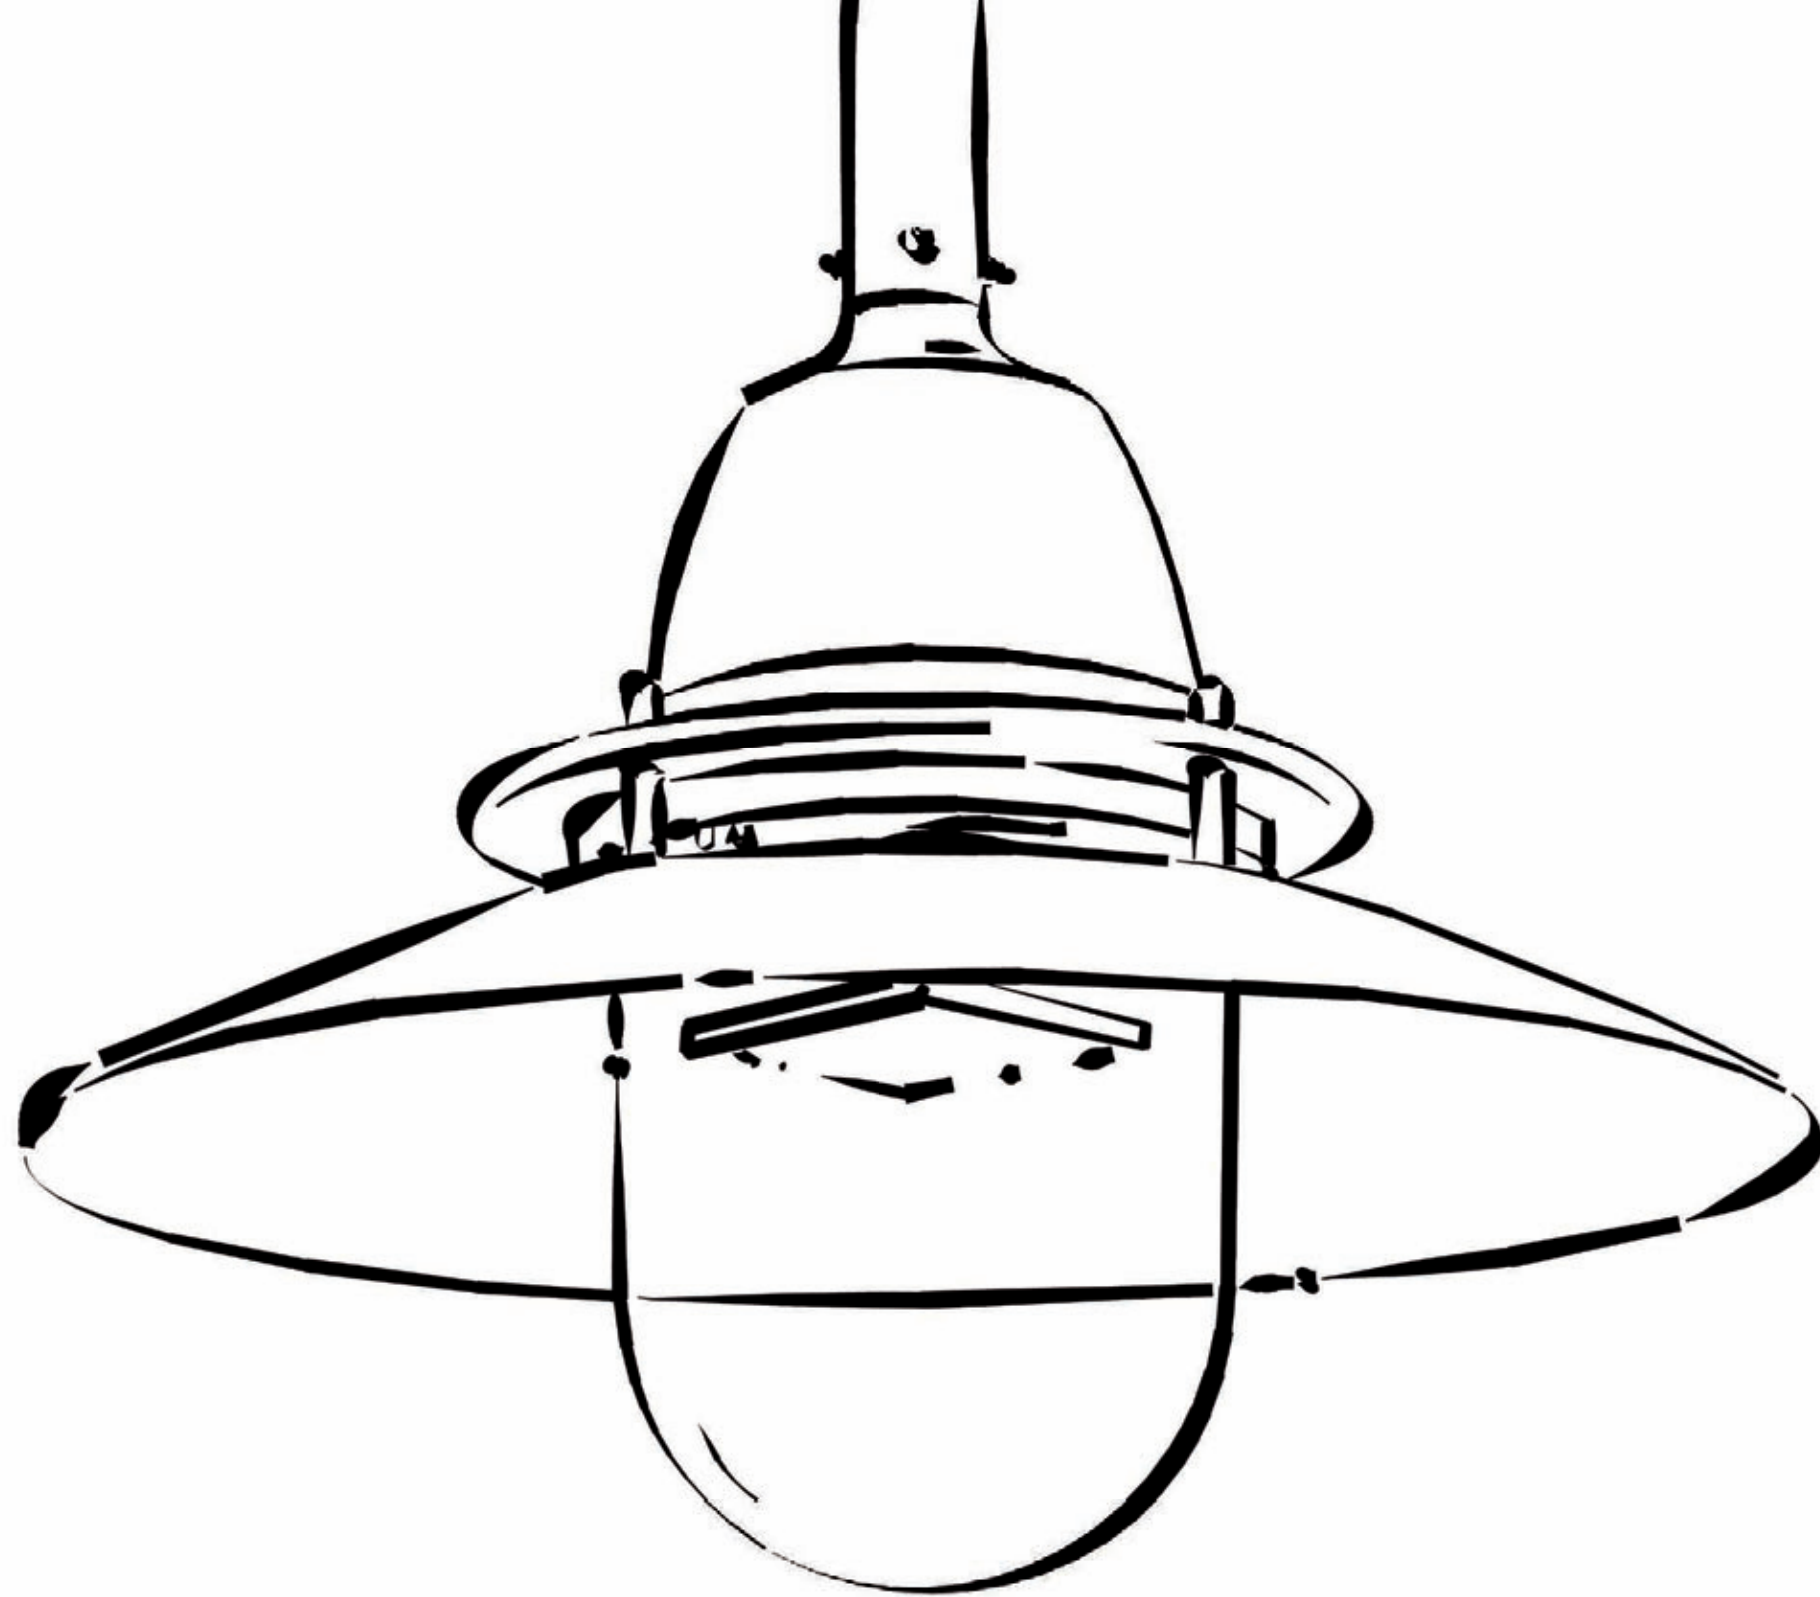

Efficient LED-modules with
different light distribution

Vulkan-Patent-System – quick
and safe

Detailed product information may be obtained on the Internet or via our employees.

V8466 LED

The bell-shaped luminaire –
Symbiosis of tradition and mo-
dernity!

Classic and timeless design
meets modern technology.

Classic and timeless design
meets high-quality material.

Classic and timeless design
meets durability and ease of
maintenance.

Classic and sustainable -
Typically Vulkan.

V8466 LED

Safe and easy pole fixation

Efficient LED-modules in familiar classic design

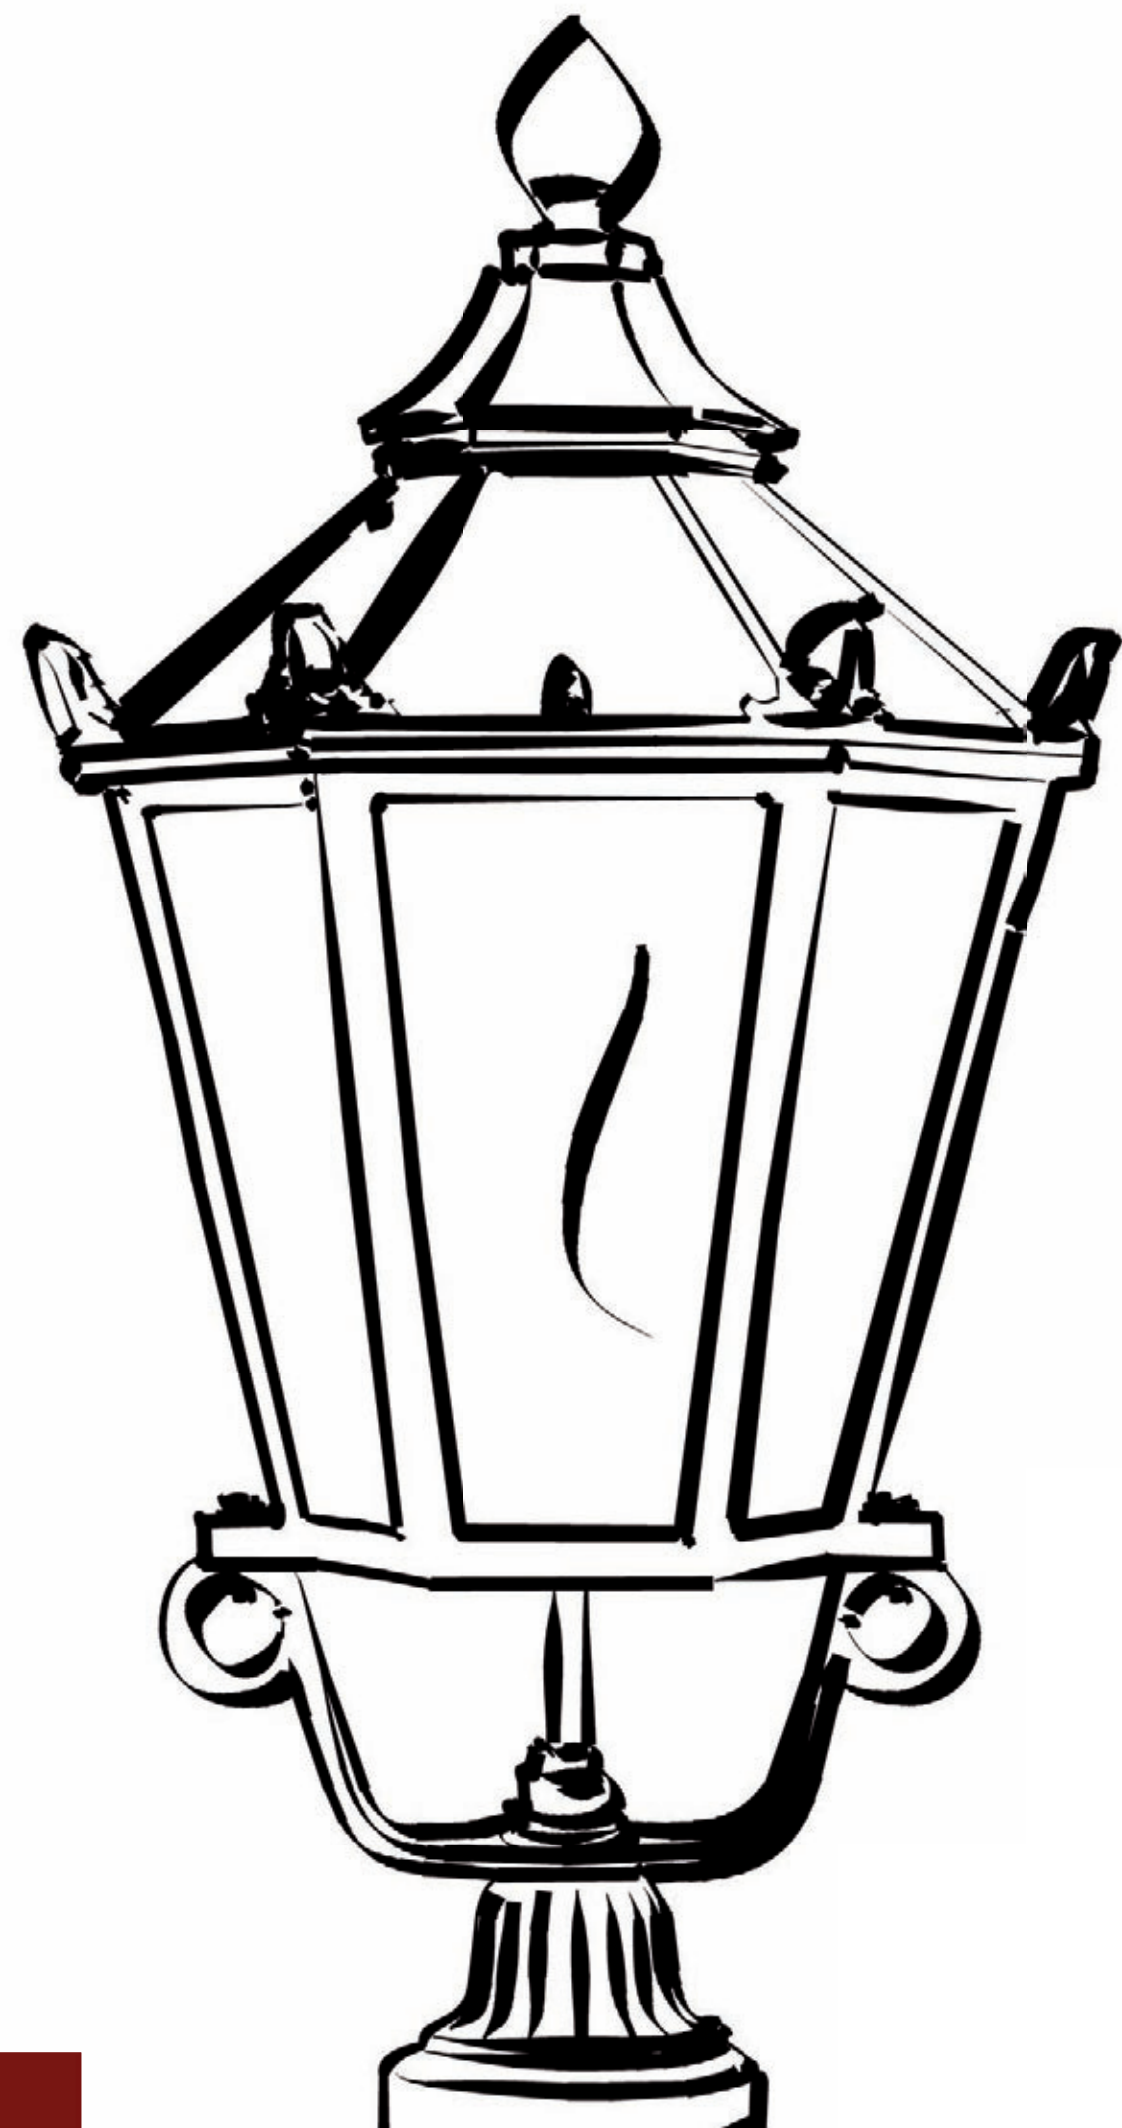

Quick installation thanks to Vulkan-Patent-System

Detailed product information may be obtained on the Internet or via our employees.

Heritage luminaires V7428

Foto: Dr. Holger Fuchs

V7428 LED

Heritage lighting - Newly designed!

Vulkan – since 1898.
Vulkan is one of the oldest brands
in the lighting industry.
Thereby, we can offer all these dif-
ferent styles in product design.
And these historical luminaires
are designed with the newest
technology by us.

A combination between Classic
and Modernity –
Typically Vulkan

V7428 LED

Hexagonal, classic design like 115 years ago

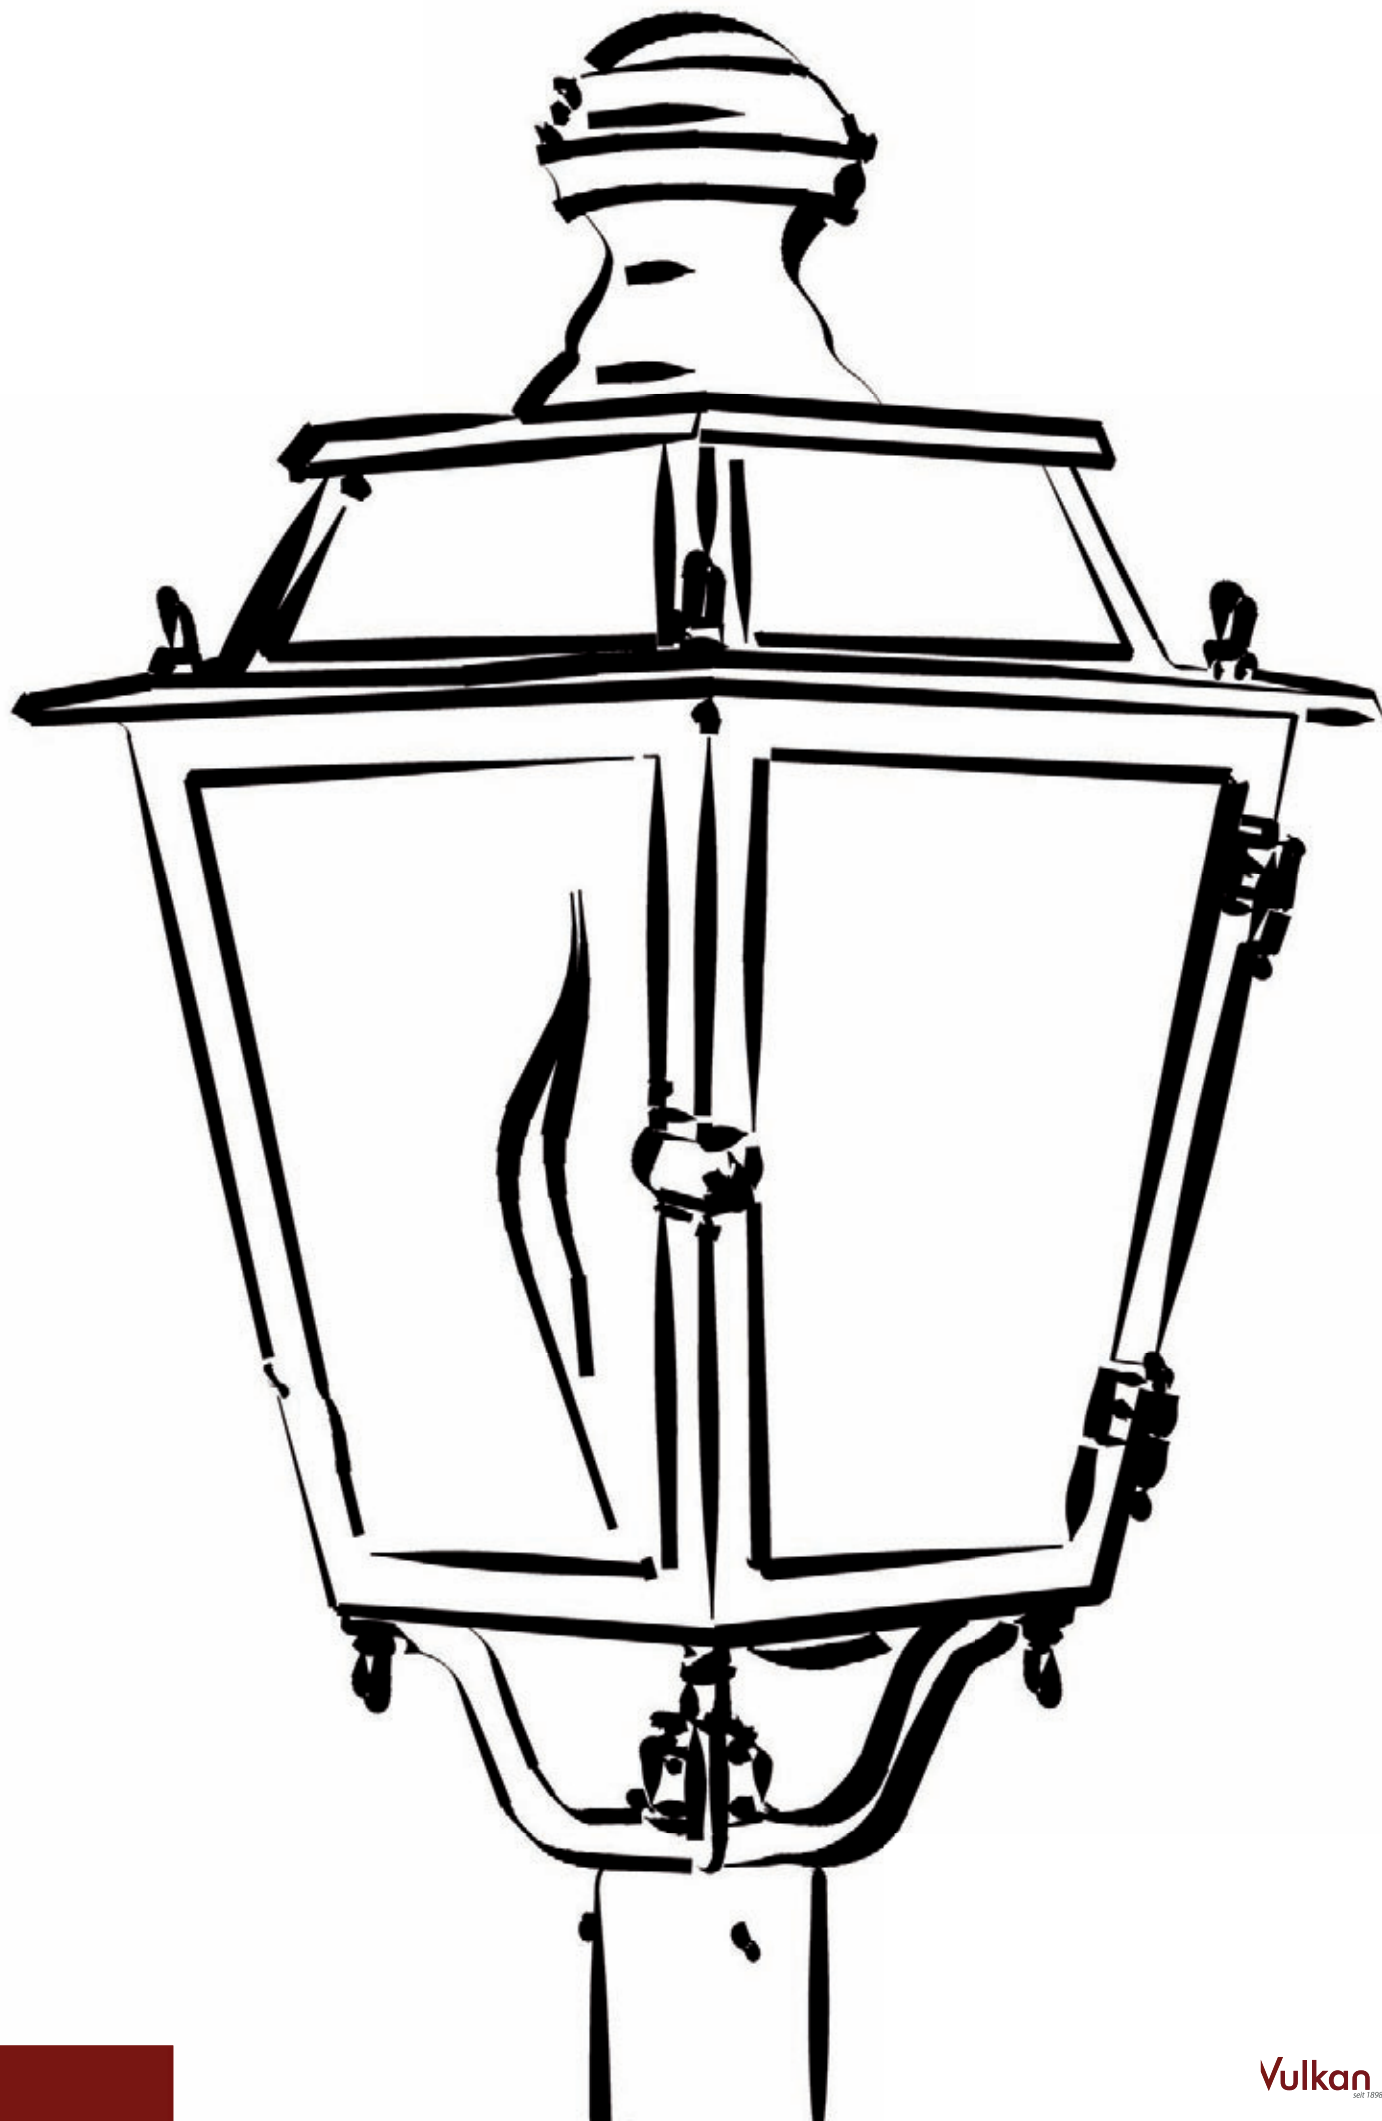

Modern technology decoratively packaged. LED module in light bulbs optics

Historical design - secure fixation

Detailed product information may be obtained on the Internet or via our employees.

V7429 LED

Heritage lighting – antique and modern at the same time!

Heritage lighting stands for recoverability.

Heritage lighting stands for safety.

Heritage lighting stands for functionality.

Heritage lighting stands for modern technology.

From outside antique, from inside modern –
Typically Vulkan.

V7429 LED

Subtle and classic in design

From outside antique, from inside modern

Safe and easy pole fixation

Detailed product information may be obtained on the Internet or via our employees.

About Vulkan

In 1898, 116 years ago, the starting shot for a long established history of the production of outdoor luminaires was given. Vulkan’s first mission was to illuminate the Rhine shore of Cologne with gas lamps. A further cornerstone in the chronicle of Vulkan was the illumination of the city skyline of Cologne, which was organized by Konrad Adenauer on the occasion of the Pressa in 1928. Meanwhile Vulkan counts to the oldest producers of outdoor luminaires in Germany. Since 2013, Vulkan belongs to the Nordeon Group and aligned their scope to improve energy efficiency by the development of luminaires with modern LED-technology.

Vulkan is the best partner for industry, cities and communities when it is a matter of restoration and reorganization of lighting systems. The independent design and the quality, as well as the tailoring of the high-quality lighting technology to the specific application, the maintenance friendly construction, high-quality materials and a solid manufacture, made Vulkan an international brand.

The production located in Springe has all the relevant processes for the production of the luminaires. With our fully automated paint shop, we are able to realize individual paintings for our customers.

Our whole production chain, such as our LEAN production are automated and highly flexible. Thereby we have the needed agility, to quickly switch between product variants and to accomodate changing requested production quantities. This agility in production is supported by our specific optimized production tools, which take over all the needed processes, such as grinding, rotating and milling. To provide a high quality standard, all the staff gets continuous training. All relevant production areas, more than 35% of the total production facility, are special ESD protection zones.

In all the processes and products we apply our integrated management system for quality, environment, health and safety. Our certificates according to DIN ISO 9001, DIN ISO 14001 und OSHSAS 18001 are supporting this.

Technical – Elegant – Efficient

Vulkan - The traditional brand

Vulkan, as no other brand in the lighting industry, especially in the German-speaking countries, combines most innovative LED-technology with many years of experience - more than 115 years of experience.

Technically functional luminaires with beautiful and elegant design. High-quality, maintenance-friendly and with attractive conditions - Typically Vulkan.

Vulkan

A company of the NORDEON Group

As a member of the Nordeon Group, Vulkan benefits from the technical innovations from one of the largest manufacturers for professional LED-lighting in Europe. Vulkan builds on the stability and the infrastructure of an excellent international group of companies.

We look forward to another 100 years - Typically Vulkan

Vulkan
