40+ Years of Optimizing Energy

reduce • reuse • renew • optimize

Partnering with the NH Grocers Association !

- Dedicated to identifying and engineering energy savings solutions, and becoming an ongoing resource and energy partner.
- Enhancing Cooling Capacity and Performance of Refrigeration/ Freezer and HVAC equipment and systems.
- LED Lighting/Controls for every form factor - Cooler Case, Interior Ceiling, High Lumen Exterior Areas, etc.
- Offering a wealth of technologies and expertise for a vast array of load groups and subsystems found in energy intensive operations - like the food industry!

Our solutions do not aim to control or govern operations. We optimize your machinery and infrastructure power usage to reduce and recover your energy and resources so less is required to run your plant. Demand is improved concurrently.

Grocery Stores are unique in their energy usage characteristics, and challenges. Refrigeration/Cooling Systems, along with Lighting, constitute 85%-90% of all electricity and fuel costs - largely independent of the season! We adopt an integrated, whole facility approach towards operational reduction and optimizations through a diverse array of technologies addressing these, and many, subsystems.

We become a resource for you from initial engagement, through engineering, deployment, and verification of all efficiency improvements. Post installation, we commit to a periodic, formal MnV process based on the EvoWorld - a US Dept. of Energy entity - IPMVP Protocol for assessing and measuring energy performance. This is a central element of every suite of solutions we implement.

- ☐ Savings are guaranteed and insured through a Lloyds of London underwritten policy.
- ☐ Typical results are 12%-30% reduction in energy consumption, with paybacks of three years or less. Benefits contribute directly to improved operational profitability.
- ☐ Part of our process is to accompany you in obtaining available rebates and incentives to assist in covering cost of investment.
- ☐ We are eager to get to know you, and understand your facility and operations, in order to design best in class, cost-effective solutions.

☐ ***For Inquiries, Information, or to begin a Conversation, contact us!***

Now offering free initial analysis and estimates to NHGA member organizations!
Proud to be a partner, and member, of the NH Grocers Association.
