Your Door-to-Door Supply Chain Advantage

Offering a powerful combination of trucking and rail solutions

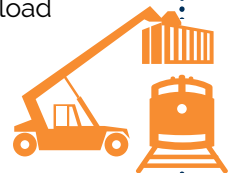

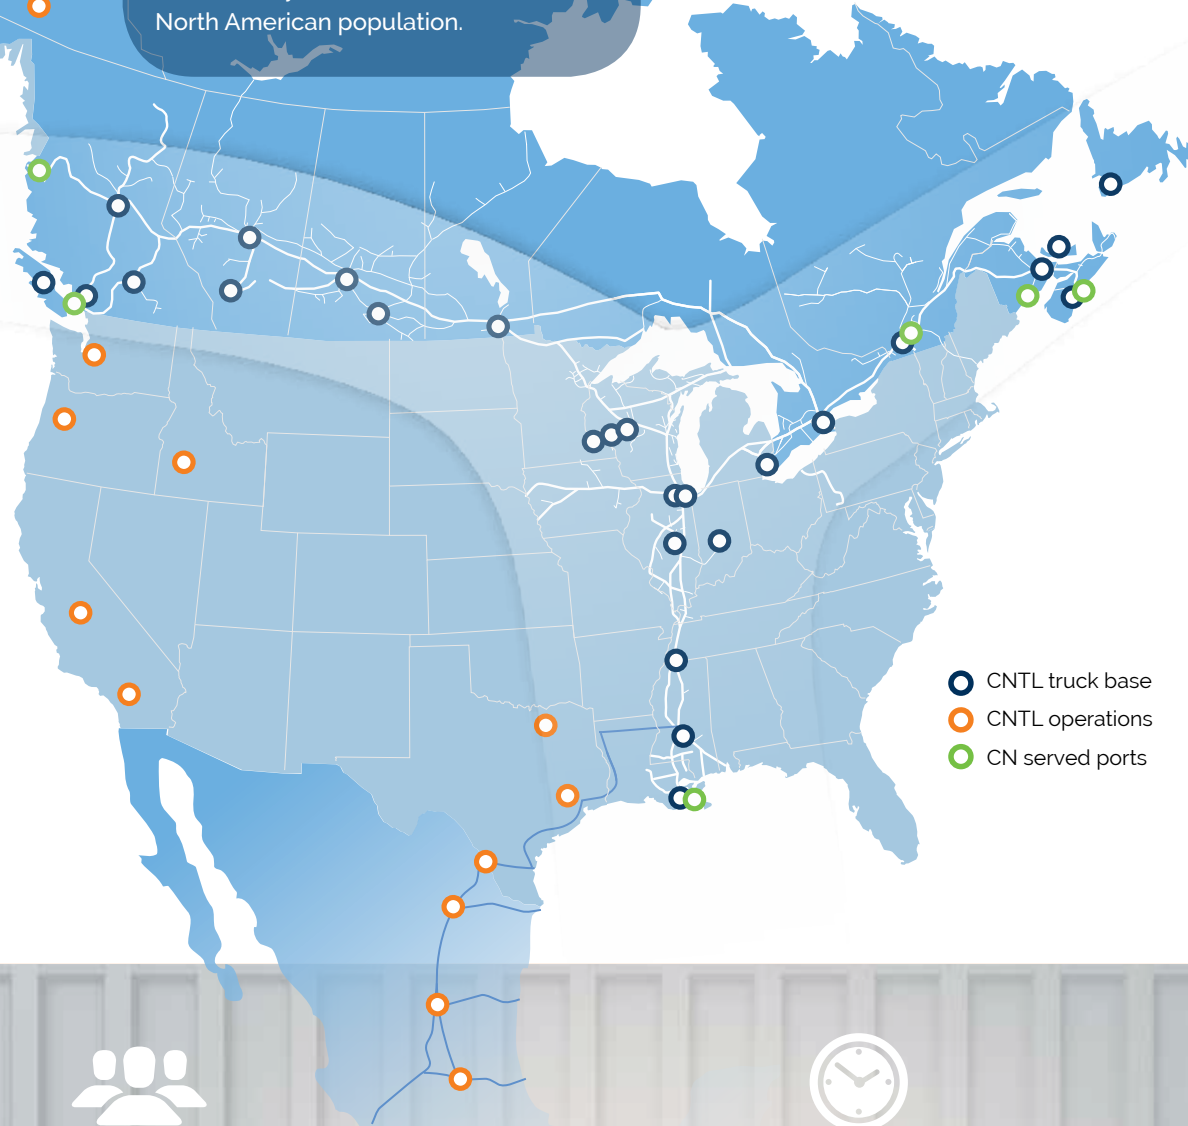

A complete transportation solution for Canada, USA and Mexico

Security and visibility from beginning to end - from one source.

CN is recognized as the best-run railroad in the world. But did you know we also run a highly efficient trucking operation? Our precision railroading model carries over into our trucking service which greatly improves the predictability of your shipments. Using CN rail along with CN trucking, saves both time and transportation costs.

CNTL trucking operates out of CN's Intermodal terminals throughout North America. CN works with over 1050 owner/operators situated along our network and in outlying locations giving us the ability to reach 75% of the North American population.

- CNTL truck base
- CNTL operations
- CN served ports

- 21 intermodal terminals across North America
- Rail connections to 3 coasts and 5 major ports
- 5 logistics parks in Canada and the U.S.
- Interline rail to, and local trucking provided at, destinations on the U.S. west coast (for refrigerated cargo) and Mexico (for refrigerated and dry cargo)
- Service to Newfoundland, PEI, and Vancouver Island

- 1050 truck owner/operators and 108 outside carriers
- CN-owned equipment.
- Over 8000 containers combined with over 8000 chassis
- Opportunity for direct reload after unloading - saving additional dray costs and increasing container availability through faster turn-around times

- Dedicated customer service team
- Exception management

- 24/7 operational service
- Precision pickup and delivery schedules
- Complete control and visibility over the whole trip from one source

- Consistent top tier safety performance using state-of-the-art dispatch and safety technology
- CSA compliant

- Environmental controls in place for fuel efficiency and emission reductions
- SmartWay® compliant in the U.S. and Canada

- Customs brokerage services providing seamless border clearances
