

Name	Inverter DC MMA Welding Machine (RILON)
Model	ARC 250
Peculiarity	1. Compact in volume, light in weight and power saved 2. Easy to arc initiation, resistance to interference, good force adjustment 3. Stable welding current, low welding spatter 4. Good welding result, deep welding pool, high intension 5. Protection for over voltage, over current 6. Automatic voltage pulsation compensation capability. 7. Applicable for various acid and basic welding electrodes 8. Down hand cellulose electrodes

Main Technology Parameter Table

Power voltage (V) :	AC380	Power factor :	0.93	Rated input current(A) :	14.3
No-load loss(W) :	50	Output current (A) :	20-250	Housing Protection grade :	IP21
Rated output volt.(V) :	30	Rated output current(A) :	250	Insulation grade :	B
Max thickness(mm) :	10	Duty cycle (%) :	60	Efficiency(%) :	85
Weight(kg) :	17.5	Dimensions(mm) :	480×204×303s		
Remark :	power frequency : 50HZ ;
