ALBERO CON CONO SPINDLE W/AR- BOR ANTRIEBSPIN-

Albero con cono in acciaio cementato e temperato. Realizzato in un solo pezzo per aumentare il carico alla flessione del 25%, interamente rettificato ed equilibrato a 6,3G. Riesce a raggiungere alte velocità senza vibrazioni.

Spindle with arbor made as one solid piece of hardened steel to increase resistance to bending stress up to 25%. Completely ground and balanced at 6,3G. Possibility to reach higher RPM without vibrations

Spindel und Kegel sind aus gehärtetem Stahl. Aus einem Stück gefertigt, um die Biegefestigkeit um 25% zu erhöhen. Komplette geschliffen und auf 6,3G ausgewuchtet. Es ist möglich, höhere Drehzahlen ohne Vibrationen zu erreichen.

CORPO TESTA BODY GEHÄUSE

Corpo testa in ghisa sferoidale GS-600 stabilizzata per un assorbimento totale delle vibrazioni. Stabilità termica e rigidità superiori ad altri materiali (es. acciaio e alluminio). Cromatura opaca sul corpo e sedi dei cuscinetti interamente rettificati.

Casting made of GS 600 stabilized spheroidal cast iron to better absorb vibrations. Increased thermal stability and rigidity compared to materials such as steel and aluminum. Mat chromed finishing outside and ground bearing housing

Gehäuse aus stabilisiertem GS 600 Gußeisen, um die Vibrationen besser zu dämpfen. Bessere Wärmestabilität und Steifigkeit im Vergleich zu anderen Materialien wie Stahl und Aluminium. Matte Chrombeschichtung und innere Kugellagersitze komplett geschliffen.

MANDRINO SPINDLE AUFNAHME

Albero porta-utensile in acciaio legato, temperato e con doppio labirinto. Completamente rettificato, con tolleranze inferiori ai 5 micron, per garantire una durata maggiore dell'utensile in lavorazione.

Output spindle made of hardened alloyed steel with double labyrinth seal. Completely ground with tolerance lower than 5 micron to ensure a longer tool life.

Aufnahme aus gehärtetem legierten Stahl mit Doppellabyrinthdichtung. Komplette geschliffen mit Toleranzen unten 5 µm, um eine längere Standzeit zu sichern.

FLANGIA INDEX INDEXING FLANGE FLANSCH

Flangia di indexaggio monolitica per garantire un'iterasse preciso. Il perno cilindrico assicura una notevole stabilità durante le lavorazioni.

Flange arm and pin as monolithic piece to grant an increased rigidity and stability to the whole structure whilst machining. Very precise pitch dimension and perfect match of the cylindrical pin with the stop block sleeve.

Flansch und Drehmomentstütze in monolithischem Design, um eine bessere Steifheit und Stabilität während der Bearbeitung zu gewährleisten. Sehr genaue Abstandmaße und präzise Abstimmung zwischen Drehmomentstütze und Anschlagblock.

FASCE LAPPATE LAPPED SUR- FACE GELÄPPTES BAND

Fasce lappate per il corretto allineamento dell'utensile

Lapped side surface for correct alignment of the tool.

Geläpptes Band für die korrekte Ausrichtung (Einstellung) des Werkzeugs.

CARATTERISTICHE TECNICHE TESTE ALBERTI

CUSCINETTI BEARINGS KUGELLAGER

Cuscinetti a contatto obliquo precaricati in ABEC7-ABEC9. Con le sedi rettificate del corpo permettono una perfetta concentricità e stabilità di tutti gli organi rotanti, necessaria per raggiungere performance di lavorazioni superiori.

Angular contact super precision bearings with ABEC 7 and 9 accuracy rate. Mounted in ground bearing housing inside of the body, they ensure a perfect concentricity and stability during machining.

Super präzise Kugellager mit ABEC 7- und 9-Genauigkeitsgrad. Sie sind in vorgeschliffene Sitze innerhalb des Gehäuses eingebaut, um die beste Rundlaufgenauigkeit und Stabilität während der Bearbeitung zu sichern.

INGRANAGGI GEARS GETRIEBE

Ingranaggi realizzati in superleghe di acciaio, temperati e interamente rettificati. Vengono trattati con lucidatura isotropica che conferisce loro una rugosità pari a 0,01 Ra e un abbattimento notevole delle vibrazioni e dell'attrito.

Gears made of steel superalloy. They are hardened, completely ground and treated with isotropic polishing which allows to reach 0,01Ra roughness with a dramatic reduction of the vibrations and friction.

Getriebe aus Stahl-Superlegierung. Nach dem Härten und Schleifen werden die Zahnräder auch trowalisiert, um eine Rauigkeit von 0,01Ra sowie eine bemerkenswerte Reduzierung von Reibung und Vibrationen zu erreichen.

TENUTE MECCANICHE MECHANICAL SEALS MECHANISCHE DICHTUNGEN

Tenute meccaniche studiate appositamente per sopportare alte pressioni fino a 100 bar e alti numeri di giri.

Mechanical seal specially studied to reach high pressure up to 100 bar and higher RPM.

Mechanische Dichtungen, die für Hochdruck bis 100 bar und erhöhte Drehzahlen spezifisch entwickelt wurden.

GUARNIZIONI SEALS DICHTUNGEN

Tenute a bassissimo coefficiente d'attrito progettate dall'azienda con mescola particolare. Per le alte velocità sono previste tenute senza contatto con sistemi di pressurizzazioni.

Low-friction seals made of a special composition. All studied and developed by Alberti.

Reibungsoptimierte Dichtungen aus einer Sonderzusammenstellung, die von Alberti entwickelt wurde.

Tutti i particolari sono caratterizzati da nostro logo e codice per garantirne l'autenticità del prodotto e facilitare la ricerca dei particolari di ricambio. Tutti i controlli sono affidati alla macchina di misura di alta precisione in camera controllata.

All spare parts are laser marked with Alberti logo to guarantee the authenticity and simplify the recognition of each single item.

All parts are measured with our new high precision 3D measuring machine inside a controlled room temperature.

Alle Einzelteile sind mit unserem Logo und der Artikelnummer markiert, um die Authentizität der Produkte zu beweisen und deren Erkennung zu erleichtern.

Alle Teile werden auf unserer neuer hochpräzise 3D Messmaschine in kontrollierten Temperatur Raum gemessen.

Macchina di misura tridimensionale Mitutoyo Legex 776.
Three-dimensional measuring machine Mitutoyo Legex 776.

Dreidimensional Messmaschine Mitutoyo Legex 776.

Perché SCEGLIERE I PRODOTTI originali ALBERTI?

Why choose Alberti products? / Warum Alberti Produkte wählen?

ESPERIENZA EXPERIENCE - ERFAHRUNG

Da 35 anni di esperienza – più di 50 nazioni servite – oltre 50.000 prodotti installati.

Alberti progetta e costruisce teste angolari da quasi 3 generazioni continuando a garantire gli stessi standard di alta qualità e funzionalità.

35 years experience – more than 50 countries served – over 50.000 products installed Alberti designs and manufactures angle heads for over 3 generations by guaranteeing the same high standards of quality and reliability.

35 Jahre Erfahrung – mehr als 50 Länder werden bedient – über 50.000 Produkte wurden installiert. Alberti entwickelt und fertigt Winkelbohrköpfe seit fast 3

VASTA GAMMA PRODOTTI WIDE RANGE OF PRODUCTS – GROSSE AUSWAHL AN PRODUKTEN

Alberti vanta un'ampia gamma di teste standard, con possibilità di variazioni costruttive e di personalizzazioni per ciascun modello a seconda delle richieste. Tutte le teste Alberti rappresentano al 100% la qualità del vero "made in Italy".

Alberti is proud to offer a wide range of standard heads with any possible manufacturing modifications and customizations according to customer's needs. All Alberti heads represent 100% of the real "made in Italy" quality.

Alberti bietet eine große Auswahl an Standardköpfen mit unterschiedlichen Möglichkeiten an Fabrikationsänderungen je nach Kundenbedarf. Alle Alberti-Köpfe stellen 100% der echten "Made in Italy" -Qualität dar.

TECNOLOGIA TECHNOLOGY - TECHNOLOGIE

Soluzioni tecniche innovative - materiali e trattamenti di eccellenza - più del 5% del fatturato investito in ricerca e sviluppo per assicurare una cura minuziosa in ogni dettaglio.

Innovative technical solutions - high quality materials and top class surface treatment - over 5% of the total turnover is reinvested in research and development to grant that the highest attention is given to the smallest detail.

Innovative technische Lösungen, höchste Qualität an Materialien und spitzenmäßige Oberflächenbehandlung – über 5% des Gesamtumsatzes wird in Forschung und Entwicklung investiert, um immer die größte Aufmerksamkeit den kleinsten Details

ASSISTENZA ASSISTENCE / UNTERSTÜTZUNG

Team di progettisti e tecnici specializzati per un assistere il cliente. Efficiente servizio di supporto pre e post vendita con un reparto riparazione dei prodotti e assistenza ricambi. Centri di assistenza autorizzati in America e Cina

Skilled and experienced engineering team. Complete pre and post sales. Support with an efficient parts and repair service department. Rapid and guaranteed delivery schedules. Repair centres in USA & CHINA

Ein gut ausgebildetes und top-geschultes Team von Ingenieuren bietet komplette Unterstützung vor und nach dem Kauf mit effizienter Beratung und schnellem Reparaturservice. Prompte Reaktions- und Lieferzeiten. Reparaturzentren in USA

Testa a 90° con o senza flangia per pezzi grossi

90° Head with or without flange for big workpiece / 90° Kopf mit oder ohne Abstützung für größte Werkstück

Testa a 90° prolungata

90° head with extended length / 90° Kopf mit verlängerter

Testa a 2 uscite contrapposte

Head with dual output opposite / Kopf mit zwei gegeneinanderen

Testa fissa ad angolo variabile

Head with variable fixed angle / Kopf mit unterschiedlichen

Testa rinviata per spazi ristretti

Offset head for reduced spaces / Zurückgesetzter Kopf für schmale

La gamma offerta dall'azienda Alberti si è ulteriormente ampliata nel corso degli anni e può offrire soluzioni ad hoc con prodotti innovativi.

The range of Alberti products has broaden over the years and now offers customized solutions with innovative products.

Die Standardreihe von Alberti Produkten, hat sich im Laufe des Jahres noch mehr vergrößert und bietet heute gezielte Lösungen für alle Notwendigkeiten.

TURBOFLEX / TURBODRILL / SLIMLINE

Soluzioni a 20.000/30.000 e 60.000 RPM con motori ad aria e manipoli NSK per cambio utensile automatico. Adatti soprattutto per microlavorazioni o incisioni con utensili da 0,1 a 6 mm, anche per macchine con cono ISO/BT-30.

Solutions for 20.000 – 30.000 and 60.000RPM with integrated air motors for automatic tool change. Suitable for micromachining, engraving, small drilling, milling and polishing operations using tools from 0,1 up to 6mm. Now available also for ISO / BT 30 shanks on tapping machines.

Luftangetriebene Köpfe mit Luftmotoren und Spindeln von NSK, die bis zu 20.000 - 30.000 oder 60.000 min⁻¹ erreichen können. Sie sind für automatische Werkzeugwechsel und kleinere Bearbeitungen mit max Werkzeugdurchmesser von 0,1mm bis 6mm geeignet. Jetzt auch für kleinere Zentren mit ISO / BT30-Spindel verfügbar.

MINILINE

Teste angolari in alluminio ultraleggero e soluzioni compatte per macchine con attacco ISO / BT-30.

Ultralight angle heads and special compact solutions suitable for small size machines with ISO / BT 30.

Ultraleichte Köpfe und kompakte Lösungen für kleinere Maschinen mit ISO / BT 30-Spindel.

LIVE TOOLS / MOTORIZZATI / ANGETRIEBENE WERKZEUGE

Portautensili fissi e rotanti per diverse case di torni (Nakamura, Okuma, Mori Seiki e Mazak) con torrette BMT o VDI disponibili anche nella versione Smart Change, ovvero, con un nuovo sistema a cambio rapido per offrire maggiore versatilità.

Static and driven tools suitable for different machines such as Nakamura, Okuma, Mori Seiki, Mazak, etc with BMT or VDI attachment. Now also available with our new quick change system Smart Change, to offer greater flexibility.

Statische und angetriebene Werkzeuge passend für unterschiedliche Drehmaschinen wie z.B. Nakamura, Okuma, Mori Seiki, Mazak, usw. mit BMT- oder VDI-Revolverkopf. Jetzt verfügbar auch mit unserem neuen System SMART CHANGE für einfachen, schnellen und präzisen

APPICAZIONI SPECIALI PER AEREAUTICA / SPECIAL APPLICATION FOR AEROSPACE / SPEZIELLE ANWENDUNG FÜR AEROSPACE

Soluzioni speciali studiate ad hoc per il mercato aeronautico in grado di forare, svasare ed eseguire piccole cave in spazi ridotti e superfici irregolari.

Special solutions properly designed to satisfy the market's requirements in the aerospace sector. Specifically dedicated for drilling and milling operations in inaccessible spaces or in complex geometry parts.

Sonderlösungen für die Luftfahrtindustrie, die für Fräs- bzw. Bohrbearbeitungen an kleinen und schwer erreichbaren Stellen besonders geeignet sind.

MULTIPLICATORE / SPEEDER / SCHNELLAUFSPINDEL

Moltiplicatore di giri meccanico 1:5 fino a 25.000 RPM max con cono e interasse modulari.

Mechanical spindle speeder 1:5 up to max 25.000 RPM with modular shank and pitch dimension.

Mechanische Schnellaufspindel 1:5 bis auf max 25.000 MIT mit modularen Kegel und Flansch.

LINEA CONTROL

Linea di teste per macchine con cambio utensile automatico possono essere montate nel magazzino utensili ed essere scambiate automaticamente al mandrino macchina. La corretta posizione in macchina è assicurata dalla presenza dello stop block montato sul mandrino che garantisce sia l'antirotazione della testa che la perfetta stabilità.

This range of angle heads is designed to be used on machining centres with ATC tool changer and therefore can be mounted in the tool magazine and be automatically exchanged in the machine spindle. The correct positioning of the head is ensured by the stop block mounted on the machine spindle which also prevents the rotation.

Diese Winkelköpfe sind für die NC Bearbeitungszentren mit Werkzeugwechsler geeignet und können von Werkzeugmagazin zur Maschinenspindel automatisch transportiert werden. Der Stop Block, der auf dem Maschinenspindel angeschraubt ist,

Supporto 3 punti 3 point support - 3-Punkte Abstützung

Per aumentare la rigidità e stabilità durante la lavorazione, è possibile realizzare una flangia con 3 punti di supporto. La flangia viene realizzata su misura a seconda delle dimensioni del mandrino macchina. Solitamente per questo tipo di realizzazione si prevede un magazzino esterno o una stazione pick up per accogliere la testa

In order to increase rigidity and stability during machining, Alberti can build a special flange with 3 point support system. The flange is custom-made according to the dimension of the machine spindle. With this system the head cannot be loaded into the tool magazine but requires an external uploading or pick up station

Um die Starrheit und Rigidität während der Bearbeitung zu erhöhen, können alle Köpfe mit einer 3-Punkte

PICK UP E SUPPORTI PER TESTE GROSSE

PICK UP AND SUPPORTS FOR BIG HEADS - PICK UP UND UNTERSTÜTZUNG FÜR GRÖßE

In caso di teste molto grosse e ingombranti Alberti può studiare un semplice pick up esterno da montare sulla tavola per alloggiare tutte quelle teste che non possono essere montate in cambio utensile standard.

In case of big and heavy heads Alberti can study a simple pick up station to be placed on the table.

Im Fall von großen und schweren Köpfen kann Alberti eine einfache Pick Up Station entwickeln welche auf der Maschinentische separat gestellt werden kann.

LINEA MODULAR

Le teste della linea MODULAR sono adatte ad essere montate su macchine utensili tradizionali da fissare al mandrino tramite apposita flangia. Sono dotate di un cono intercambiabile, una flangia universale e la possibilità di avere alcuni moduli di prolunga per variane la lunghezza. Per un corretto montaggio, è necessario realizzare una flangia di adattamento da interporre tra la testa e il mandrino.

Angle heads of the MODULAR line are suitable to be mounted on traditional machine tools and are attached to the spindle through a flange. They are sold together with an interchangeable shank and a universal flange and they can extend the total length thanks to extension spacers. For a correct mounting, it is necessary to build an adapting flange to be screwed between the head and the machine spindle.

Winkelköpfe von Linea MODULAR sind für traditionelle Werkzeugmaschinen geeignet und werden an der Maschinenspindel durch einen Flansch angebaut. Diese Köpfe sind zusammen mit einem wechselbaren Kegel und Universalflansch verkauft und können unterschiedlichen

LINEA MODULAR

La serie di teste MODULAR permette di variare la lunghezza utile del corpo tramite l'aggiunta di moduli di prolunga. E' possibile utilizzare fino a 2 moduli consecutivi da montare come indicato.

With MODULAR Series of heads there is the possibility of extending the total length of the body by adding extension spacers.

We suggest to use no more than 2 extensions together.

Das Modulare System der MODULAR-Serie-Köpfe ermöglicht es, die Gesamtlänge durch Anwenden von Verlängerungsmodulen zu erweitern.

MASCHIATURA / TAPPING / GEWINDESCHNEIDEN

Per le operazioni di maschiatura, tutte le teste standard possono utilizzare le pinze compensate. Queste pinze sono perfettamente intercambiabili con le normali pinze elastiche utilizzate per le altre operazioni, e permettono ai maschi di avere una corsa assiale di compensazione per eventuali errori di avanzamento e per l'inversione della rotazione.

La stessa testa, quindi, può essere impiegata sia per forare che per maschiare compatibilmente alla capacità della relativa pinza.

For tapping operations, all standard heads can be equipped with axially-compensating collets. These collets are fully interchangeable with the normal collets and allow the tap to move axially thereby compensating for any feed error and facilitating reversal of direction of rotation. A single head can therefore be used for both drilling and tapping, up to the diameter

Alle Standardköpfe können für das Gewindeschneiden mit axialausgleichenden Spannzangen ausgerüstet werden. Diese Spannzangen sind mit den normalen Spannzangen voll kompatibel und ermöglichen dem Gewindeschneidewerkzeug sich axial zu bewegen und damit etwaige Einspeisungsfehler auszugleichen und die Richtungsumkehr der Rotation zu erleichtern. Ein einzelner Kopf kann somit

	Head / Tipo testa / Kopf	Collet / Tipo Pinza / Spannzange	Capacity / Capacità / Durchmesser	Shift / Corsa / Weg
	T90-1,5	ET-1-16	M1-M6	7 mm
	T90/TCU-2,5	ET-1-25	M1-M12	8 mm
	T90/TCU-3,5	ET-1-32	M4-M16	10 mm
	T90-4,5	ET-1-40	M6-M20	13 mm

NOTE: Each collet is designed to accommodate an individual tap size. Therefore, please specify the tap shank diameter when ordering collets. Ogni pinza può portare una sola grandezza di maschio. Perciò sarà necessario specificare, in sede di ordine, il diametro del gambo del maschio che si intende utilizzare. Jede Spannzange ist für spezifische Gewindegrößen gemacht. Bitte geben Sie bei Ihrer Bestellung von Spannzangen den Gewindedurchmesser an.

DATI TECNICI / TECHNICAL DATA / TECHNISCHE DA-

Maximum misalignment of input and output drive spindle
Disassamento tra albero in entrata e mandrino portautensile
Maximale Abweichung der angetriebenen Achsen

Tool spindle angular variation relative to 90° (theoretical value)
Errore angolare del mandrino portautensile rispetto al 90° teorici
Winkelabweichung relativ zu 90° (theoretisch)
