

Hybrid SB

Sticker Spreader and Buffer Solution

Agriculture application: Buffering the spray tank mix to maximize the pesticides efficacy while providing sticker and spreader abilities in order to wet though the leaves.

Crops indicated: All Characteristics:

1. Adjust pH of spray water to reduce pesticide hydrolysis
2. Provide abilities of sticker and spreader
3. Turn spray water into pink color, easy to indicate
4. Aid solubility of soluble fertilizers and micronutrients
5. Maximize pesticide efficacy, better stability
6. Aid leaves absorption of fertilizers and micronutrients
7. Improve water penetration of the old over liming soil
8. Aid roots absorption of fertilizers and micronutrients

Products	Ingredients
Hybrid SB	Buffer Sticker and Spreader
Hybrid Cu	Buffering fertilizer with 0.25% Cu
Hybrid Zn	Buffering fertilizer with 2% Zn
Hybrid Mg	Buffering fertilizer with 1% Mg
