

## Effervescent Chelates (White Powder)

This formulation is produced by dehydrate anhydrous technology in order to make effervescent high concentrate powder that dissolve in water quickly during mixing. This formulation contains buffering agent which enhances efficient nutrient absorption and stability of the pesticides in the tank mix. This formulation is compatible with most pesticides and fertilizers.

| Products        | Ingredients                                       |
|-----------------|---|
| CAB PREMIUM 124 | 12% Ca, 4%B                                       |
| PADDY FEED      | 4.1% Mg, 3.94%Ca, 1.18%Mn, 1.35%Zn, 1.05%B        |
| CHERILON COMBI  | 5% Mg, 1.75% Zn, 1.3% Mn, 1% B, 1.86% Ca, 0.1% Mo |
